Unit Missions

TELR Mission Statement

Mission statement
The purpose of the Teacher Education Programs is to prepare highly qualified and confident teachers who will provide effective instruction that will positively impact the learning of a diverse student population. The Educational Leadership Program prepares educational leaders who can address the unique challenges of the Mississippi Delta region by providing the knowledge necessary to improve leadership effectiveness, teacher quality, and thus, student achievement.

Learning Outcomes

**BSE-ELE 01: LO Mastery of the appropriate content and skills.**

Start: 7/1/2012
End: 6/30/2013

**Learning Outcome**
Demonstrate mastery of the appropriate content and skills.

**Data Collection (Evidence)**
1. Institutional reports and individual score reports for the Praxis II Subject Area Test in Elementary Education and the Praxis II Principles of Learning and Teaching (PLT) were the assessment tools used. In addition, all Praxis attempts have been captured in Banner to provide a more detailed analysis of first-time pass rates.

2. These assessments are norm-referenced measures, the passage of which is required to receive a teaching license in Mississippi. The assessments are taken by all candidates prior to admission to the teaching internship.

3. The assessment results were analyzed using Task Stream reports. Data results were compared with those of past years to identify trends in strengths and weaknesses in candidates' knowledge of content and pedagogy.

**Results of Evaluation**

**Spring 2012 – Campus Group**

(N = 21). The mean score on the Praxis II Subject Area Test was 168.81, with a median score of 166; the minimum passing score is 158. On the Praxis II PLT, the mean score was 166.24 and the median 166; the minimum passing score is 152. Two failed on the first two attempts, and four candidates failed on the first attempt. This indicates only a 71% first-time pass rate. All candidates successfully completed the internship and all met the minimum GPA requirement for Admission to Teacher Education Admission and Internship to Internship.

**Spring 2012 – Hinds Group**

(N = 5). The mean score on the Praxis II Subject Area Test was 174.40, with a median score of 176; the minimum passing score is 158. On the Praxis II PLT, the mean score was 163.60 and the median 166; the minimum passing score is 152. Two candidates failed the Praxis II Subject Area Test on the first attempt. This indicates only a 60% first-time pass rate. All but two students successfully passed the Praxis II PLT on the first attempt. All candidates successfully completed the internship and met the minimum GPA requirement for Admission to Teacher Education and Admission to Internship.

**Fall 2012 – Campus Group**

(N = 21). The mean score on the Praxis II Subject Area Test was 174.48, with a median score of 173; the minimum passing score is 158. Five candidates did not pass the Praxis II Subject area test on the first attempt and two students did not pass on the second attempt. This indicates a 75% first-time pass rate. All candidates successfully completed the internship and met the minimum GPA requirement for Admission to Teacher Education and Admission to Internship.

**Fall 2012 – Hinds Group**

(N = 5). The mean score on the Praxis II Subject Area Test was 169.43, with a median score of 167; the minimum passing score is 158. Two candidates did not pass the Praxis II Subject area test on the first attempt. This indicates only a 71% first-time pass rate. All candidates successfully completed the internship and met the minimum GPA requirement for Admission to Teacher Education and Admission to Internship.

**Use of Evaluation Results**

Continue to track the Praxis II Subject Area Test scores and Principles of Learning and Teaching test scores. Track first-time pass rates for the Praxis I. Provide for interventions prior to the first test administration for all teacher education candidates.

First time pass rate on the Praxis II Subject Area Test continue to be a concern. Therefore, workshops prior to test taking have been implemented.

**Related Items**

**BSE-ELE 02: LO Demonstrate mastery of content knowledge**

Start: 7/1/2012
End: 6/30/2013

**Learning Outcome**
Demonstrate mastery of content knowledge.

**Data Collection (Evidence)**
1. College BASE (C-Base), a criterion-referenced academic achievement exam (covering mathematics, social studies, science, and English) was administered. The C-Base was developed at the University of Missouri and is used across the U.S. as an assessment of content knowledge for pre-service elementary education teacher candidates. Scores range from 40 – 560, with a mean score of 300. Reports provide mean scores and standard deviations for each tested group.

2. The assessment was administered to all candidates in CEL 301 Introduction to Elementary Education/CUR 362 Orientation and Field Experiences, as a measure of students’ content knowledge.

3. An institutional summary and individual score reports provided descriptive data. Data results were compared with those of past years to identify trends in strengths and weaknesses in candidates’ knowledge of content.

**Results of Evaluation**

The following results are reported on four groups of candidates. Group one consists of on-campus students taking the C-Base test in March 2012. Group two consists of candidates enrolled in the Hinds 2 + 2 Program who took the test in March 2012. Group three consists of on-campus candidates taking the C-Base test in September 2012. Group four consists of candidates enrolled in the Hinds 2 + 2 Program who took the test in September 2012.

**Spring 2012 – Campus Group**

(N = 28). Averages and standard deviations respectively were English, 232 and 65; mathematics, 250 and 49; science 210 and 65; and social studies, 219 and 46. The composite score for candidates was 229.

The highest average performance was in the area of Math (Average = 250). The math score is 21 points higher than the composite score of 229, indicating a meaningful difference between these candidates' performance in math and their overall performance on the C-Base. The second highest average performance was in the area of English (Average = 232). The English score is 3 points higher than the composite score of 229. Because this group of candidates' math score and English score exceeds the composite score, they have demonstrated a relative strength in math and English as compared to other areas in which they were tested. The standard deviation for this group in math is 49. While the math scores are the highest of this group of candidates, the standard deviation indicates that English had greater variance of student scores than math.

For this group of candidates, science scores were the lowest at an average of 210, which is 19 points lower than the group composite score of 229. Nineteen points represents a meaningful difference, thus this group of candidates shows a minor weakness in science as compared to other tested areas. The standard deviation for science scores is 49. It indicates a smaller variance in scores compared to English with a standard deviation of 65.

**Spring 2012 – Hinds Group**

(N = 14) Averages and standard deviations respectively were English, 252 and 55; mathematics, 262 and 37; science 260 and 52; and social studies, 231 and 50. The composite score...
The highest average performance for these candidates was in the area of math (Average = 262). However, the math score is only 3 points higher than the composite score of 259, not indicating a difference between these candidates’ performance in math and their overall performance on the C-Base. The science score also exceeds the composite score, but only by 1 point. Because this group of candidates’ math scores and science scores exceed the composite score, they have demonstrated a slight strength in these areas as compared to other areas in which they were tested. The standard deviation for this group in math is 37 and the standard deviation in science is 52.

For this group of candidates, social studies scores were the lowest at an average of 231, which is 28 points lower than the group composite score of 259. This represents a meaningful difference and indicates a significant weakness in social studies as compared to other tested areas.

Fall 2012 – Campus Group

(N = 23) Averages and standard deviations respectively were English, 231 and 51; mathematics, 257 and 45; science, 218 and 51; and social studies, 202 and 49. The composite score for candidates was 224.

The highest average performance was in the area of math (Average = 257). The math score is 33 points higher than the composite score of 224, indicating a meaningful difference between these candidates’ performance in math and their overall performance on the C-Base. The second highest average performance was in the area of English (Average = 231). The English score is 7 point higher than the composite score of 229. Because this group of candidates’ math score and English score exceeds the composite score, they have demonstrated a relative strength in math and a slight strength in English as compared to other areas in which they were tested. The standard deviation for this group in math is 45. While the math scores are the highest of this group of candidates, the standard deviation indicates that English had greater variance of student scores than math.

For this group of candidates, social studies scores were the lowest at an average of 202, which is 22 points lower than the group composite score of 224. Twenty-two points represents a meaningful difference, thus this group of candidates shows a weakness in social studies as compared to other tested areas. The standard deviation for social studies scores is 49.

Fall 2012 – Hinds Group

(N = 13) Averages and standard deviations respectively were English, 231 and 41; mathematics, 285 and 47; science, 218 and 54; and social studies, 206 and 22. The composite score for candidates was 237.

The highest average performance was in the area of mathematics (Average = 285). The math scores are 48 points higher than the composite score of 237, indicating a meaningful difference between these candidates’ performance in mathematics and their overall performance on the C-Base. Because this group of candidates’ mathematics scores exceed the composite score, they have demonstrated a relative strength in mathematics as compared to other areas in which they were tested. The standard deviation for this group in mathematics is 47.

For this group of candidates, social studies and science scores were the lowest. Social studies scores were an average of 206, which is 31 points lower than the group composite of 237. Science scores were an average of 218, which is 19 points lower than the group composite score of 237. This represents a meaningful difference and indicates a weakness in social studies and science as compared to other tested areas. The standard deviation for social studies scores is 22. The standard deviation for science scores is 54. The scores indicate that the smallest variance for this group is in the area of social studies.

Trends Noted

On the C-Base, candidates typically score highest in the area of English and lowest in the areas of social studies and science. However, when compared to the national norms, the candidates demonstrated low to marginal content knowledge of science, social studies, English, and math.

Use of Evaluation Results

Candidates began taking the C-Base in 2006. The results for each group of candidates taking the test have been low to marginal and this trend continues. However, the 2012 scores are beginning to show an increase from all scores since the 2006 scores. Actions based upon those trends have been to conference with candidates regarding their individual scores. Faculty will continue to meet with candidates and offer tutoring advice. Faculty can now offer specific sites for candidates to receive help in the different content areas. Candidates may use the writing lab and the Office of Academic Support Services. The departments of science and social studies are working on tutorials for candidates who score low in these areas.

It appears that candidates in both the campus program and the Hinds program performed strongest on measures related to Association for Childhood Education International Standards 2.1 (Reading, Writing, and Oral Language); and 2.3 (Mathematics); with 2.2 (Science) and 2.4 (Social Studies) being areas of weakness. The Hinds candidates performed better than the on-campus students in all areas with the exception of the Fall 2012 group in English and Science. The scores were the same in those two areas. The scores are consistent with data provided by ACT composite averages for students entering the Elementary Education Program at this institution. Elementary faculty will continue to use this test data to establish a baseline reference upon which to determine how best to direct students in their efforts to compensate for content area weaknesses. Even though candidates take the C-Base test upon entering the elementary education program, the test is not used as an admission requirement. The instructor for the introductory course in which the C-Base is given, meets with each candidate individually after scores are received. The instructor, along with the candidate’s advisor, discusses the score report with the candidate. Low scores provide a basis for the advisor to devise an action plan with the candidate to improve his/her content knowledge.

Faculty members will continue to review courses of action for improving the content preparation of candidates entering the elementary education program with content area deficits.

BSE-ELE 03: LO Plan an integrated unit of instruction for a diverse student population.

Start: 7/1/2012
End: 6/30/2013

Learning Outcome

Demonstrate the ability to plan an integrated unit of instruction for a diverse student population.

Data Collection (Evidence)

1.a. The Integrated Units are scored with grading rubrics developed by the faculty; the grading rubrics are linked to the Association for Childhood Education International (ACEI) standards, the international professional association that guides Elementary Education teacher preparation programs. The grading rubrics contain the following components: Contextual Factors and Class Description, Learning Goals: Objectives, Concepts, and Skills, Lesson Planning Structure and Content, Assessment Plan, Subject Area Integration, Assessment Plan, Home/School/Community Connection, and Reflection and Self-Evaluation.

2.a. Data was collected in TaskStream, the online information technology system used by the College of Education.

3.a. TaskStream reports I provided means and score distributions.

(See Appendix A, Instrument 1 for the Integrated Lesson Plan scoring guide.)

1.b. The Teacher Intern Assessment Instrument Indicators 1 – 9 were used to assess the candidates’ ability to plan instruction.
2.b. Data were collected during CEL 317 Principles and Techniques of Teaching in Early Childhood and CEL 318 Principles and Techniques of Teaching in the Middle Grades, as well as in the teaching internship experience.

3.b. A 4-point rubric was used. TaskStream reports provided descriptive data.

(See Appendix A, Instrument 2 for the Teacher Intern Assessment Instrument scoring guide.)

Results of Evaluation

Spring 2012, Campus Group – CEL 317 Principles and Techniques of Teaching in Early Childhood

(N=25) Overall results showed that candidates in the CEL 317 – Principles and Techniques of Early Childhood demonstrated their ability to plan at or above the acceptable levels in most categories of the Integrated Unit. An area that is of concern is that of assessment planning. In spring 2012, 8% of the candidates scored at the emerging or unacceptable level in this category.

Spring 2012 Hinds Group – CEL 317 Principles and Techniques of Teaching in Early Childhood

(N=9) Overall results showed that candidates in the CEL 317 – Principles and Techniques of Early Childhood demonstrated their ability to plan at or above the acceptable levels in most categories of the Integrated Unit. An area that is of concern is that of differentiated instruction. In spring 2012, 11% of the candidates scored at the emerging level in this category.

Overall, with the exceptions of assessment planning and differentiated instruction the candidates in both groups demonstrated that they were able to effectively and appropriately plan for elementary students.

Spring 2012 - Campus Group – CEL 318 Principles and Techniques of Teaching in the Middle Grades

(N=25) Overall results showed that candidates in the CEL 318 Principles and Techniques of Teaching in the Middle Grades demonstrated their ability to plan at or above the acceptable levels in most categories of the Integrated Unit. An area that is of concern is that of using a variety of materials. In Spring 2012, 29% of the candidates scored at the emerging level in this category.

Spring 2012: Hinds Group – CEL 318 Principles and Techniques of Teaching in the Middle Grades

(N = 11) Overall results showed that candidates in the CEL 318 Principles and Techniques of Teaching in the Middle Grades demonstrated their ability to plan at or above the acceptable levels in most categories of the Integrated Unit. An area that is of concern is that of Differentiated Instruction. In Spring 2012, 52% of the candidates scored at the emerging level in this category.

Overall, with the exception of Differentiated Instruction and Using A Variety of Materials, the candidates in both groups demonstrated that they were able to effectively and appropriately plan for elementary students.

Fall 2012: Campus Group – CEL 317 Principles and Techniques of Teaching in Early Childhood

(N=22) 95% of candidates were able to articulate appropriate and clear learning goals for students, while 90% of candidates effectively and appropriately aligned learning objectives with standards. Eighty-eight percent of candidates developed learning goals that were significant, challenging and varied. Within the CEL 317, Principles and Techniques of Teaching in Early Childhood, Lesson Plan component, which was completely revised to more thoroughly address each of the content areas and candidates' ability to plan for each of these areas, 81-85% of candidates were able to effectively plan objectives, instructional activities, and materials for all areas of language arts. The weakest areas of the language arts section of lesson planning were related to the candidates' abilities to differentiate instruction and to the area of writing. This was evident with only 76% of candidates scoring at an acceptable or target level. In the area of science, 85-89% of candidates were able to effectively plan objectives, instructional activities, materials, and differentiate instruction. The weakest area of science lesson planning was related to the candidates' abilities to plan for engaging students through inquiry with only 76% of candidates at the acceptable or target level. For the integrated areas of the arts, physical education and health, 77-81% of candidates were at the acceptable or target levels for planning in these areas with physical education being the lowest area at 77%. For the CEL 317 Assessment Plan component, 86% of candidates aligned learning goals and instruction and 91% used multiple modes and approaches of assessment at the acceptable level or target level while 83% of candidates appropriately adapted assessments based on the individual needs of students.

Other areas of the Integrated Unit included Contextual Factors, Home/ School/ Community Connections, and Reflection and Self-Evaluation. For Contextual Factors, 86% of candidates adequately displayed knowledge of students’ varied approaches to learning, students’ skills and prior learning, and implications for instructional planning and assessment. The weakest areas of contextual factors were knowledge of community, school, and classroom factors and characteristics of students with only 80% of candidates at the acceptable or target levels. The instructor is aware of this potential weakness and is addressing this through identification of specific websites regarding contextual factors and how this affects teaching and learning. Ninety to ninety-three percent of candidates performed at the acceptable or target level for all indicators of Home/School/Community Connections. In regard to Reflection and Self-Evaluation, 86-90% of candidates effectively interpreted student learning, gained insights on effective instruction and assessment, and were able to articulate implications for future teaching and professional development.

Fall 2012 Hinds Group – CEL 317 Principles and Techniques of Teaching in Early Childhood

(N= 9) 100% of the Hinds candidates were able to articulate appropriate and clear learning goals for students that were significant, challenging and varied, while 98% of candidates appropriately aligned objectives with national, state, and local standards. Within the CEL 317, Principles and Techniques of Teaching in Early Childhood, Lesson Plan component, which was completely revised to more thoroughly address each of the content area and candidates’ ability to plan for each of these areas, 96-100% of candidates were able to effectively plan objectives, instructional activities, and materials for all areas of language arts. The weakest areas of the language arts section of lesson planning were related to the candidates’ abilities to differentiate instruction. This was evident with only 73% of candidates scoring at an acceptable or target level. In the area of social studies, 88-92% of candidates were able to effectively plan objectives, instructional activities, and materials. As with language arts, the weakest area of social studies lesson planning was related to the candidates’ abilities to differentiate instruction with only 83% of candidates at the acceptable or target level. In the area of mathematics, 87-92% of candidates were able to effectively plan objectives, instructional activities, and materials. Even though the weakest area of mathematics lesson planning was related to the candidates’ abilities to differentiate instruction, it was not extremely low with 88% of candidates at the acceptable or target level. The lowest area of mathematics lesson planning was related to diagnosing mathematical errors with 80% of candidates at the acceptable or target level. In the area of science, 85-89% of candidates were able to effectively plan objectives, instructional activities, materials, and differentiate instruction. The weakest area of science lesson planning was related to the candidates’ abilities to plan for engaging students through inquiry with only 76% of candidates at the acceptable or target level. For the integrated areas of the arts, physical education and health, 77-81% of candidates were at the acceptable or target levels for planning in these areas with physical education being the lowest area at 77%. For the CEL 317 Assessment Plan component, 86% of candidates aligned learning goals and instruction and 91% used multiple modes and approaches of assessment at the acceptable level or target level while 83% of candidates appropriately adapted assessments based on the individual needs of students.

Other areas of the Integrated Unit included Contextual Factors, Home/ School/ Community Connections, and Reflection and Self-Evaluation. For Contextual Factors, 86% of candidates adequately displayed knowledge of students’ varied approaches to learning, students’ skills and prior learning, and implications for instructional planning and assessment. The weakest areas of contextual factors were knowledge of community, school, and classroom factors and characteristics of students with only 80% of candidates at the acceptable or target levels. The instructor is aware of this potential weakness and is addressing this through identification of specific websites regarding contextual factors and how this affects teaching and learning. Ninety to ninety-three percent of candidates performed at the acceptable or target level for all indicators of Home/School/Community Connections. In regard to Reflection and Self-Evaluation, 86-90% of candidates effectively interpreted student learning, gained insights on effective instruction and assessment, and were able to articulate implications for future teaching and professional development.

Fall 2012 - Campus Group – CEL 318 Principles and Techniques of Teaching in the Middle Grades

(N= 22) Overall results showed that candidates in the CEL 318, Principles and Techniques of Teaching in the Middle Grades demonstrated their ability to plan at or above the acceptable levels in most categories of the Integrated Unit. An area that is of concern is that of instructional planning and assessments. In Fall 2012, 30% of the candidates scored at the emerging level in this category.
In fall 2012 within the Learning Objectives component for CEL 318, 81-86% of candidates were able to articulate appropriate and clear learning objectives for students, while 96% of candidates effectively and appropriately aligned learning objectives with standards. Eighty-nine percent of candidates developed learning goals that were significant, challenging and varied. Within the CEL 318 Lesson Plan component, which was completely revised to more thoroughly address each of the content area and candidates' ability to plan for each of these areas, 73-79% of candidates were able to effectively plan objectives, instructional activities, and differentiate instruction for all areas of language arts. The weakest areas of the language arts lesson planning were related to the candidates' abilities to plan for the different areas of language arts. This was evident with only 68% of candidates scoring at an acceptable or target level for these areas. In the area of social studies, 68-71% of candidates were able to effectively plan objectives, materials, and differentiate instruction. The weakest area of social studies lesson planning was related to the candidates' abilities to plan instructional activities for teaching social studies with only 80% of candidates at the acceptable or target level. In the area of mathematics, 76-79% of candidates were able to effectively plan objectives, materials, and differentiate instruction. As such, in social studies, the weakest area of mathematics lesson planning was related to the candidates' abilities to plan instructional activities with 69% of candidates at the acceptable or target level. In the area of science, 70-81% of candidates were able to effectively plan objectives, materials, and differentiate instruction. The weakest area of science lesson planning was again related to the candidates' abilities to plan instructional activities for teaching science with only 67% of candidates at the acceptable or target level. For the integrated areas of the arts, physical education and health, 71-87% of candidates were at the acceptable or target levels for planning in these areas with health being the lowest area at 71%. For the CEL 318 Assessment Plan component, 68% of candidates used multiple aligned goals and approaches to assessment at the acceptable level or target level while only 66% of candidates appropriately adapted assessments based on the individual needs of students.

Some areas are of concern for both groups of candidates, in the majority of categories, candidates demonstrated that they were able to effectively and appropriately plan for middle school students.

### Methods Courses

**Spring 2012 - Campus Group – CEL 317**

(N = 24) – Indicators 1-9 of the Teacher Intern Assessment Instrument was used, with a rating scale of 0-3. For CEL 317, Principles and Techniques of Teaching in Early Childhood, mean ratings ranged from 2.03/3 on incorporating diversity to 2.60/3 on uses assessment information and incorporates diversity. The overall mean was 2.50/3.

**Spring 2012 - Hinds Group – CEL 318**

(N = 9) – Indicators 1-9 of the Teacher Intern Assessment Instrument was used, with a rating scale of 0-3. For CEL 317, Principles and Techniques of Teaching in Early Childhood, mean ratings ranged from 1.80/3 on incorporates diversity to 2.11/3 on using knowledge of student interests to 2.23/3 on prepares appropriate assessments. 2.38/3 on integrates knowledge from several subject areas to 2.50/3 on selects a variety of appropriate materials and technology and plans plans appropriate teaching procedures to 2.63/3 on selects developmentally appropriate objectives for lessons based on state frameworks to 2.83/3 on uses assessment information. The overall mean score was 2.40/3. For CEL 318, Principles and Techniques of Teaching in Middle Grades, mean ratings ranged from 2.08/3 on prepares appropriate assessments to 2.48/3 on uses assessment information and incorporates diversity. The overall mean was 2.30/3.

### Teaching Internship

**Spring 2012 – Campus Group**

(N = 14) – On the Teacher Intern Assessment Instrument (TIAI), Coordinating Teacher mean ratings ranged from 2.71/3 on incorporates diversity to 2.86/3 on uses assessment information and integrates knowledge from several subject areas to 2.93/3 on using knowledge of student interests, plans appropriate teaching procedures, using a variety of strategies, selects a variety of appropriate materials and technology, selects developmentally appropriate objectives for lessons based on state frameworks and prepares appropriate assessments to 3.09/3 on selects a variety of appropriate materials and technology. On the final observation, DSU Supervisor mean ratings ranged from 2.78/3 on prepares appropriate assessments and integrates knowledge from several subject areas to 3.03/3 on plans appropriate teaching procedures, selects a variety of appropriate materials and technology, and uses a variety of strategies.

**Spring 2012 – Hinds Group**

(N = 16) – On the Teacher Intern Assessment Instrument (TIAI), Coordinating Teacher mean ratings ranged from 1.44/3 on incorporates diversity to 1.75/3 on integrates knowledge from several subject areas to 1.94/3 in using assessment information to 2.06/3 on using knowledge of student interests to 2.63/3 on using a variety of strategies to 2.69/3 on selects a variety of appropriate materials and technology to 2.88/3 on selects developmentally appropriate objectives for lessons based on state frameworks and prepares appropriate assessments to 3.00/3 on plans appropriate teaching procedures. On the final observation, DSU Supervisor mean ratings ranged from 1.44/3 on incorporating diversity to 3.03/3 on appropriate teaching procedures.

**Fall 2012 – Campus Group**

(N = 22) – On the Teacher Intern Assessment Instrument, Coordinating Teacher mean ratings ranged from 2.58/3 on uses higher-order questions to engage students in analytical, creative, and critical thinking and uses family and/or community resources (human or material) in lessons to enhance student learning, to 3.00/3 on communicates high expectations for learning to all students.” On the final observation, Delta State University Supervisor mean ratings ranged from 2.86/3 on “Establishes opportunities for communication with parents and/or guardians (newsletters, positive notes, extracurricular activities, etc.)” to 3.03/3 on “Plans appropriate teaching procedures and Integrates knowledge from several subject areas in lessons.”

Fall 2012 – Hinds Group
Data from 2009, 2010, and 2011 identified incorporating diversity into planning and teaching as a weakness and this seems to be improving with the 2012 data. Field trips to diverse settings and seminars regarding diversity are continuing to be implemented.

Use of Evaluation Results
Faculty in all classes that require candidates to plan lessons will continue to emphasize each component of the planning process. A concentrated effort will be made to continue to teach candidates how to differentiate instruction to meet the needs of diverse learners. Seminars will be offered to candidates in the area of differentiated instruction. Special attention will also be given to variety of ways to assess students, to include using prior knowledge and a variety of instructional activities.

Data from 2010-11 identified incorporating diversity into planning and teaching as a weakness and this seems to be improving with the 2012 data. Field trips are planned to diverse settings and seminars regarding diversity are continuing to be implemented.

Candidates’ performance in several areas showed an increase from 2010. Faculty will closely monitor these areas to determine any long term trends.

- GE 10: Values

2. Observation data from the candidate’s Cooperating Teacher and Delta State University Supervisor was collected.

3. Data were collected and analyzed in TaskStream. Analysis reports contain means, medians, and distribution of scores for each indicator. Aggregate ratings of cooperating teachers and Delta State University Supervisors were studied by the faculty to identify strengths and weaknesses in the performance of the interns and the results were compared with those of past years to identify trends.

(See Appendix A, Instrument 2 for the Teacher Intern Assessment Instrument scoring guide.)

Results of Evaluation
Domain II focuses on Communication and Interaction

**Spring 2012 – Campus Group**
(N = 14) – Cooperating Teachers identified a weakness in “Establishing opportunities for communication with parents and guardians” (2.79/3) and a strength in “Conveys enthusiasm for teaching and learning and demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment.” On the final observation, Delta State University Supervisor mean ratings ranged from 2.29/3 on “Establishes opportunities for communication with parents and/or guardians (newsletters, positive notes, extracurricular activities, etc.)” to 3.0/3 on “Uses a variety of strategies to introduce and close lessons and conveys enthusiasm for teaching and learning.”

**Spring 2012 – Hinds Group**
(N = 15) – Cooperating Teachers identified a weakness in “Establishes opportunities for communication with parents and/or guardians (newsletters, positive notes, extracurricular activities, etc.)” (1.38/3) and a strength in “Uses acceptable written, oral, and nonverbal communication” (3.0/3). On the final observation, Delta State University Supervisors identified a weakness in “Establishes opportunities for communication with parents and/or guardians (newsletters, positive notes, extracurricular activities, etc.)” (1.38/3) and a strength in “Uses acceptable written, oral, and nonverbal communication” (3.0/3).
enthusiasm for teaching and learning". (2.86/3). On the final observation, Delta State University Supervisors identified a weakness in "Establishes opportunities for communication with parents and/or guardians (newsletters, positive notes, extracurricular activities, etc.)" (2.29/3); a strength was identified in "communicating high expectations for learning and conveying enthusiasm for teaching and learning". (3.0/3).

**Domain III focuses on Teaching for Learning**

**Spring 2012 – Campus Group**

(N = 14) – Cooperating Teachers identified weaknesses in "Provides learning experiences that accommodate differences in developmental and individual needs of diverse learners (i.e., learning styles, multiple intelligences and enrichment/medial needs); provides opportunities for students to apply concepts in problem solving and critical thinking; uses higher-order questions to engage students in analytical, creative, and critical thinking; and uses family and/or community resources (human or material) in lessons to enhance student learning (2.86/3). Identified strengths were in "Demonstrates knowledge of the subject(s) taught; uses a variety of appropriate teaching strategies (e.g., cooperative learning, discovery learning, demonstration, discussion, inquiry, simulation, etc.); responds to and elicits student input during instruction, and allows sufficient and equitable wait time to encourage students to expand and support their responses (3.0/3). On the final observation, Delta State University Supervisors also identified a weakness in "uses family and/or community resources (human or material) in lessons to enhance student learning (2.91/3) and a strength in the remaining indicators in this domain (3.0/3)."

(N = 15) – Cooperating Teachers identified a weakness in "Uses family and/or community resources (human or material) in lessons to enhance student learning (2.57/3) and a strength in "Demonstrates knowledge of the subject(s) taught (2.94/3); On the final observation, Delta State University Supervisors also identified a weakness in "uses family and/or community resources (human or material) in lessons to enhance student learning (2.86/3)."

**Fall 2012 – Campus Group**

(N = 22) – Cooperating Teachers identified weaknesses in "Using community resources and uses higher-order questions to engage students in analytical, creative, and critical thinking." (2.59/3) and a strength in "Respecting and eliciting student input and Demonstrates knowledge of the subject(s) taught." (3.0/3). On the final observation, Delta State University Supervisors also identified a weakness in "Using higher order questions (2.95/3); a strength was identified in "Demonstrates knowledge of the subject(s) taught." (3.0/3)."

(N = 7) - Cooperating Teachers identified a weakness in "Uses family and/or community resources (human or material) in lessons to enhance student learning (1.25/3) and a strength in "Demonstrates knowledge of the subject(s) taught (2.94/3) and "Responds to and elicits student input during instruction (2.88/3). On the final observation, Delta State University Supervisors identified a weakness in "uses family and/or community resources (human or material) in lessons to enhance student learning (2.95/3) and a strength identified is "Responds to and elicits student input during instruction (2.88/3)."

**Fall 2012 – Hinds Group**

(N = 14) – Cooperating Teachers identified no weaknesses in this domain. Strengths were in all areas of this domain. (3.0/3). On the final observation, Delta State University Supervisors identified no weaknesses in this domain. Strengths were in "Demonstrates knowledge of the subject(s) taught and Responds to and elicits student input during instruction and Allows sufficient and equitable wait time to encourage students to expand and support their responses (3.0/3)."

(N = 16) – Cooperating Teachers identified a weakness in "Adjusting lessons" (2.86/3) and a strength in "Uses instructional time effectively (3.00/3) and "Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment" (2.86/3). On the final observation, Delta State University Supervisors identified weaknesses in "Adjusting lessons according to individual student cues, professional reflections, and group responses (2.06/3) and a strength was identified in "Uses instructional time effectively (3.00/3)."

(N = 7) - Cooperating Teachers identified a weakness in "Uses instructional time effectively (3.00/3) and a strength in "Demonstrates fairness and supportiveness" (2.59/3) and a strength in "Responding to and eliciting student input and Demonstrates knowledge of the subject(s) taught." (3.0/3). On the final observation, Delta State University Supervisors also identified a weakness in "uses family and/or community resources (human or material) in lessons to enhance student learning (1.25/3) and a strength identified is "Uses instructional time effectively (3.00/3)."

**Fall 2012 – Campus Group**

(N = 22) – Cooperating Teachers identified a weakness in "Uses a variety of strategies to foster appropriate student behavior according to individual and situational needs." (2.82/3) and a strength in "Monitoring and adjusting the environment" (2.94/3). A strength was identified in "Attends to or delegates routine tasks and Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment" (2.86/3). On the final observation, Delta State University Supervisors identified weaknesses in "Uses instructional time effectively (2.63/3) and "Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment" (2.86/3). On the final observation, Delta State University Supervisors identified weaknesses in "Uses instructional time effectively (2.63/3) and "Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment" (2.86/3)."

**Fall 2012 – Hinds Group**

(N = 7) - Cooperating Teachers identified a weakness in "Adjusts lessons according to individual student cues, professional reflections, and group responses." (2.57/3) and a strength in "Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment" (2.86/3). On the final observation, Delta State University Supervisors identified weaknesses in "Uses instructional time effectively (2.63/3) and "Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment" (2.86/3)."

**Domain IV focuses on Management of the Learning Environment**

**Spring 2012 – Campus Group**

(N = 14) – Cooperating Teachers identified no weaknesses in this domain. Strengths were in all areas of this domain. (3.0/3). On the final observation, Delta State University Supervisors identified no weaknesses in this domain. Strengths were in "Demonstrates knowledge of the subject(s) taught and Responds to and elicits student input during instruction and Allows sufficient and equitable wait time to encourage students to expand and support their responses (3.0/3)."

(N = 16) – Cooperating Teachers identified a weakness in "Uses instructional time effectively (3.00/3) and "Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment" (2.86/3). On the final observation, Delta State University Supervisors identified weaknesses in "Uses instructional time effectively (2.63/3) and a strength was identified in "Uses instructional time effectively (3.00/3)."

(N = 7) - Cooperating Teachers identified a weakness in "Uses instructional time effectively (3.00/3) and a strength in "Demonstrates fairness and supportiveness" (2.59/3) and a strength in "Responding to and eliciting student input and Demonstrates knowledge of the subject(s) taught." (3.0/3). On the final observation, Delta State University Supervisors also identified a weakness in "uses family and/or community resources (human or material) in lessons to enhance student learning (2.95/3) and a strength identified is "Uses instructional time effectively (2.88/3)."

(N = 7) - Cooperating Teachers identified a weakness in "Uses instructional time effectively (3.00/3) and a strength in "Demonstrates fairness and supportiveness" (2.59/3) and a strength in "Responding to and eliciting student input and Demonstrates knowledge of the subject(s) taught." (3.0/3). On the final observation, Delta State University Supervisors also identified a weakness in "uses family and/or community resources (human or material) in lessons to enhance student learning (2.95/3) and a strength identified is "Uses instructional time effectively (2.88/3)."

**Spring 2012 – Hinds Group**

**Domain V focuses on Assessment of Student Learning**

(N = 14) – Cooperating Teachers identified a weakness in "Maintains records of student work and performance and appropriately communicates student progress (2.71/3) and a strength in "Develops and uses a variety of formal assessments to differentiate learning experiences that accommodate differences in developmental and/or educational needs and provides timely feedback on student's academic performance and discusses corrective procedures to be taken (3.0/3). On the final observation, Delta State University Supervisors identified weaknesses in "Uses a variety of strategies to foster appropriate student behavior according to individual and situational needs" (2.57/3) and a strength was identified in "Communicates assessment criteria and performance to students and develops and uses a variety of informal and formal assessments to differentiate learning experiences that accommodate differences in developmental and/or educational needs" (2.86/3) and "Communicates assessment criteria and performance to students (2.50/3)."

(N = 16) – Cooperating Teachers identified a weakness in "Develops and uses a variety of formal assessments to differentiate learning experiences that accommodate differences in developmental and/or educational needs (1.50/3) and Provides timely feedback on student's academic performance and discusses corrective procedures to be taken (1.96/3) and strengths in "Develops and uses a variety of informal and formal assessments to differentiate learning experiences that accommodate differences in developmental and/or educational needs" (2.83/3) and "Communicates assessment criteria and performance to students (2.50/3)."

Results of Evaluation

Spring 2012 – Campus Group

(N = 24) – Overall mean ratings by component were as follows: Contextual Factors 2.66/3, Learning Goal 2.78/3, Assessment Plan 2.67/3, Design for Instruction 2.77/3, Instructional Decision Making 2.86/3, Analysis of Student Learning 2.54/3, Reflection and Self Evaluation 2.53/3, and Design for Instruction in Elementary Education 2.62/3.

Spring 2012 – Hinds Group

(N = 9) – Overall mean ratings by component were as follows: Contextual Factors 2.95/3, Learning Goal 2.69/3, Assessment Plan 2.45/3, Design for Instruction 2.75/3, Instructional Decision Making 2.54/3, Analysis of Student Learning 2.53/3, Reflection and Self Evaluation 2.53/3, and Design for Instruction in Elementary Education 2.73/3.

Fall 2012 – Campus Group

(N = 21) – Overall mean ratings by component were as follows: Contextual Factors 2.53/3, Learning Goal 2.66/3, Assessment Plan 2.41/3, Design for Instruction 2.48/3, Instructional Decision Making 2.67/3, Analysis of Student Learning 2.36/3, Reflection and Self Evaluation 2.59/3, and Design for Instruction in Elementary Education 2.42/3.

Fall 2012 – Hinds Group

(N = 20) – Overall mean ratings by component were as follows: Contextual Factors 2.77/3, Learning Goal 2.64/3, Assessment Plan 2.62/3, Design for Instruction 2.82/3, Instructional Decision Making 2.87/3, Analysis of Student Learning 2.81/3, Reflection and Self Evaluation 2.68/3, and Design for Instruction in Elementary Education 2.56/3.

Internship

Spring 2012 – Campus Group

(N = 14) – Overall mean ratings by component were as follows: Contextual Factors 2.86/3, Learning Goals 3.0/3, Assessment Plan 2.91/3, Design for Instruction 2.95/3, Instructional Decision Making 2.93/3, Analysis of Student Learning 2.98/3, Reflection and Self Evaluation 2.84/3, and Design for Instruction in Elementary Education 2.93/3.

Spring 2012 – Hinds Group

(N = 16) – Overall mean ratings by component were as follows: Contextual Factors 2.98/3, Learning Goals 3.0/3, Assessment Plan 3.0/3, Design for Instruction 2.99/3, Instructional Decision Making 2.98/3, Analysis of Student Learning 3.0/3, Reflection and Self Evaluation 2.96/3, and Design for Instruction in Elementary Education 3.0/3.

Fall 2012 – Campus Group

(N = 22) – Overall mean ratings by component were as follows: Contextual Factors 2.96/3, Learning Goals 3.0/3, Assessment Plan 2.99/3, Design for Instruction 2.99/3, Instructional Decision Making 3.0/3, Analysis of Student Learning 3.0/3, Reflection and Self Evaluation 2.96/3, and Design for Instruction in Elementary Education 3.0/3.
BSE-ELE 06: LO Demonstrate the ability to diagnose and remediate deficits in reading skills.

Learning Outcome

1. A Reading Case Study (RCS) was used to collect data during CRD 326. The grading rubric is aligned with Association for Childhood Education International (ACEI) standards and contains components that cover the areas of background information, general observations of the elementary student with whom the candidate is working, accurate test administration, analysis of testing results, recommendations for remediation, and development and implementation of needs-based instruction. The grading rubric uses a 3-point scale (Unacceptable, Acceptable, Target).

2. Each candidate in CRD 326 Diagnosis and Remediation of Reading Difficulties completed the Reading Case Study while working with an assigned student in a local school.

3. The scores were analyzed in Excel.

(N=11) Candidates scored 100% (target) in describing student data, gathering background information, and test administration and results. For this group, 96% were at the target level in the area of summary and recommendations, 88% were at the target level for the area of analysis, and 83% were at the target level for general observations. In the area of field experiences, only 52% were at the target level, 35% at the acceptable level, and 13% at the unacceptable level. For the area of analysis, 8% scored at the acceptable level and 4% at the unacceptable level. In addition, 4% were at the unacceptable level in the area of summary and recommendations.

(N=6) In the spring semester of 2012, 100% of Hinds candidates scored at the target level in describing student data, gathering background information, general observations, test administered/results, and summary/recommendations. For this group, 67% were at the target level for field experiences and teaching with 33% at the acceptable level. In addition, 50% of the Hinds candidates scored at the target level in analysis, while 17% scored at the acceptable level, and 33% scored at the unacceptable level.

(N=20) One hundred percent of candidates scored at the target level in describing background information, general observations, and tests administered and results. For this group, 95% were at the target level and 5% were at the acceptable level for tests administered/results. In the area of field experiences, 88% were at the acceptable level, and 12% were at the unacceptable level. For the area of analysis, 35% were at the target level, 65% scored at the acceptable level and 10% scored at the unacceptable level. For summary and recommendations, 75% were at the target level, 20% were at the acceptable level, and 5% were at the unacceptable level.

(N=18) One hundred percent of candidates scored at the target level in describing student data, background information, and general observations. For this group, 95% were at the target level and 5% were at the acceptable level for the RCS. In the area of field experiences, 27% were at the target level, 68% scored at acceptable level and 5% were at the unacceptable level.

Results Noted

Overall, the candidates demonstrated that they were able to impact student learning through the gathering and interpretation of student data, gathering background information, and test administered/results. One area that continues to be an area of weakness is the area of analysis for both On-Campus students and Hinds students. This is an area that will continue to be watched. Two areas of concern for spring 2012 are the unacceptable ratings in field experiences/teaching and summary/recommendations for the On-Campus candidates.
Analyzing data continues to be a low-scoring area. Faculty will continue to emphasize analyzing student data in all courses that incorporate pre-and/or post-testing.

The instructors of the course will continue to emphasize presentation of test data, summarizing case study findings, and making appropriate recommendations for further instruction. Particular emphasis will be placed upon analyzing results of data. Faculty will conference with instructor of the Fall 2012 group to inquire as to the nature of the low scores in field experiences/teaching for that group.

BSE-ELE 07: LO Exhibit professional dispositions associated with successful teaching.

Learning Outcome

Exhibit professional dispositions associated with successful teaching.

Data Collection (Evidence)

1 & 2. The undergraduate version of the Dispositions Rating Scale (DRS) was developed by the College of Education faculty and is correlated with the Teacher Intern Assessment Instrument and was used to assess students’ dispositions in CEL 301 Introduction to Elementary Education/CUR 302 Orientation and Field Experiences, and the teaching internship. The scale is also used throughout the program to document dispositional concerns and exemplary dispositions. The instrument uses a 4-point scale and assesses these professional dispositions: Fairness, Belief That All Students Can Learn, Professionalism, Resourcefulness, and Dependability.

3. Each disposition was be analyzed for means, medians, and score distributions using TaskStream.

(See Appendix A, Instrument 5 for the Dispositions Rating Scale – Undergraduate Version.)

Results of Evaluation

Dispositions Rating Scale (DRS) was developed by the College of Education faculty and is correlated with the Teacher Intern Assessment Instrument and was used to assess students’ dispositions in CEL 301 Introduction to Elementary Education/CUR 302 Orientation and Field Experiences, and the teaching internship. The scale is also used throughout the program to document dispositional concerns and exemplary dispositions. The instrument uses a 4-point scale and assesses these professional dispositions: Fairness, Belief That All Students Can Learn, Professionalism, Resourcefulness, and Dependability.

Internship

Dispositions Rating Scale

Spring 2012 – Campus Group

(N=31) - Instructor mean ratings ranged from 1.81 in Dependability to 2.03 in Fairness to 2.06 in Resourcefulness to 2.10 on the Belief that All Students Can Learn and 2.23 on Professionalism. The overall mean score was 2.05.

Spring 2012 – Hinds Group

(N=19) - Instructor mean ratings ranged from 1.87 in Professionalism and Dependability to 1.93 in Resourcefulness to 2.00 in Fairness and 2.13 on the Belief that All Students Can Learn. The overall mean score was 1.96.

Fall 2012 – Campus Group

(N=34) – Instructor mean ratings ranged from 1.85 in Dependability to 2.06 in Professionalism to 2.32 in Fairness and Resourcefulness to 2.41 on the Belief that All Students Can Learn. The overall mean score was 2.19.

Fall 2012 – Hinds Group

(N=18) – Instructor mean ratings ranged from 2.0 on the Belief That All Students Can Learn to 2.75 in Professionalism to 2.88 in Resourcefulness and Dependability to 3.00 in Fairness. The overall mean score was 2.70.

Trends Noted

Data were collected at multiple points and from multiple perspectives using the Dispositions Rating Scale (DRS) to allow for analysis with respect to a number of dimensions. These data reflect responses on instructor ratings for CEL 301 and CUR 302 and cooperating teacher and supervisor ratings for CEL 496. For the purposes of this report, data analysis focused on the following: 1) general patterns that emerged with respect to whether or not disposition evaluation results differ between the CEL 301, Introduction to Elementary Education, CUR 302, Orientation and Field Experiences, and CEL 496, Directed Teaching in the Elementary School, as well as 2) general patterns of candidate behavior with respect to professional dispositions.
The instructor's ratings for CEL 301 and CUR 302 over all semesters showed some distribution over the range of descriptors, as opposed to reflecting primarily ratings that fell exclusively in the target and acceptable ranges. There were some emerging behavior ratings in CEL 301. This is understandable since this is an Introduction to Elementary Education course. CUR 302 showed the candidates scoring in the acceptable range. Of particular concern is the marginal ratings related to professionalism, resourcefulness, and dependability for all semesters.

Data summaries related to the evaluation of dispositions during CEL 496, Directed Teaching in the Elementary School, for the campus groups revealed several patterns. First, percentages indicated that candidates performed at the target or acceptable levels according to results of cooperating teachers and university supervisors on the majority of indicators. For all indicators, university supervisors and cooperating teachers rated candidates at the acceptable to target levels.

In general, a much higher percentage of candidates were viewed by university supervisors (faculty) as functioning at targeted professional levels during CEL 496 than during CEL 301 or CUR 302. It is significant to note that the Campus and Hinds CEL 496 candidates did not receive any marginal or unacceptable ratings from either cooperating teachers or supervisors.

Use of Evaluation Results
During CEL 496, Directed Teaching Internship, candidates consistently demonstrated target and acceptable behaviors associated with the teaching profession. Cooperating teachers appeared to view their dispositions more favorably, perhaps because they work with the candidates and have difficulty maintaining objectivity. However, they do interact with the candidates in the real world, so their ratings could reflect well-rounded opportunities to interact with and observe candidates, therefore making their perceptions quite valid. University faculty may, therefore, operate from a limited view of the candidate, though they do know the candidates longer and in many contexts. Clearly, the majority of teacher candidates enter the program exhibiting the professionalism associated with Association for Childhood Education International Standards 5.1 and 5.2. They exit the program with these values, commitments, and professional ethics more firmly entrenched according to ratings from the Dispositions Rating Scale (DRS).

Related Items
There are no related items.
Fall 2012 – Campus Group
(N=22) – Mean ratings ranged from 2.32/3 (with a 4-point scale of 0-3) on Composition/Mechanics to 2.59 on Appropriate Teaching/Learning Climate and Professionalism. The overall mean rating was 2.50/3. The means of all five areas were at the Acceptable to Target level.

Fall 2012 – Hinds Group
(N=7) – Mean ratings ranged from 2.14/3 (with a 4-point scale of 0-3) on Composition/Mechanics to 3.0/3 on Appropriate Teaching/Learning Climate and Professionalism. The overall mean rating was 2.74/3. The means of all five areas were at the Acceptable or Target levels.

Trends Noted
All areas were at the acceptable level for spring. All areas were at the acceptable or target level for fall. With composition/mechanics being at the lowest rating for both the intro group and internship groups, it continues to be identified as an area of weakness.

Composition/Mechanics has been a weakness. However, that area has slightly improved within recent semesters.

Use of Evaluation Results
Continue to track Praxis I scores to identify first-attempt pass rates, as the writing subtest links to the previous weakness in Composition/Mechanics. Implement grammar/writing workshops with elementary education candidates.

EDD 01: LO Content and Pedagogical Content Knowledge

Learning Outcome
Content and Pedagogical Content Knowledge – Demonstrate mastery of the prior knowledge needed to be successful in the Doctor in Education program.

Data Collection (Evidence)
1. A Doctoral Admission Portfolio will be used. The portfolio will include a professional resume/vita, writing samples, personal philosophy of education/theory of teaching and learning, self-evaluation aligned with personal and professional goals, evidence of leadership ability, and a statement of purpose for pursuing doctoral study. A 4-point rubric is used to evaluate the portfolio.
2. The portfolio will be submitted within the first six hours in the program.
3. Average scores and pass rate percentages will be calculated.

Results of Evaluation
See results below.

Use of Evaluation Results
Recommended Changes Based upon this Analysis:
Program faculty reviewed the portfolio instructions, rubric, and tips for success. The instructions, rubric, presentation, and tips remain on the Ed.D. website. For more student convenience, we will now accept and assess portfolios in summer as well as the spring & fall dates.

Trends Noted and Actions Based upon those Trends across the Year(s):
Average scores for 2012 were higher than for the previous four years with a submission rate of approximately average with the other years. Additionally, applicants were stronger in both spring and fall semesters with zero failed attempts at the portfolio. Otherwise, submissions were stable except for the 2009 boom. The 2010 and 2011 failure rates are the same. The overall scores are slightly lower for 2011 (with such a small N, this may be because of the 2 repeaters who were unsuccessful).

Learning Outcome
Program Specific Content – Demonstrate mastery of the knowledge associated with content in Educational Leadership.

Data Collection (Evidence)
1. Comprehensive Examinations: Comprehensive examinations will be taken at the end of the program by all candidates and must be passed in order to register for ELR 888 Dissertation Seminar. They will be divided into 3 sections: research, curriculum, and supervision and based upon the core program courses and scored by program faculty.

2. Results will be compiled and analyzed by program faculty and reported to the Unit Assessment Director and the National Council for Accreditation of Teacher Education (NCATE) Coordinator annually.

3. Results will be analyzed by program faculty by section and overall scores and trends are identified.

Results of Evaluation
Analysis of Results:
There was a rather small group of candidates in spring 2011. The pass rate was high. Pass rate has increased dramatically since spring 2006. Since some students were detected attempting to cheat on comps in another program, the computers where the test is administered no longer allow internet access or USB port access during testing. All candidates are encouraged to sit for comps during the spring before they hope to take ELR 888 Dissertation Seminar since they must pass all three sections of comps before they may take this annually offered course. This gives them the following summer for any needed retakes. Therefore, comps are not usually needed during the fall semesters.

Use of Evaluation Results
Recommended Changes Based upon this Analysis:
Having seen only the 2012 version of the comprehensive exam, changes have already been made for how students are evaluated. Most notably, each of the three sections now require students to illustrate competency by offering solutions via methods of application to address practical, field-based problems and issues; this is in strict opposition to a lengthy quiz of student knowledge as has been the standard in the past–simple facts without proper application are impertinent.

Trends Noticed and Actions Based upon those Trends across the Year(s):
Students struggled most with the research portion of comp, which for 2012 was comprised of approximately 100 true-false and multiple choice questions about statistical facts. Entirely absent was any sort of interpretation of data or synthesis of findings with meaning. Since at least 2010, the research section was failed most often, resulting in retakes in summer. It seems that after each instance of retaking a portion of the exam, students pass; this is peculiar in some ways but until a stable form of testing is established one can only speculate.

Related Items
> GE 03: Quantitative Skills
EDD 03: LO Ability to Plan
Start: 7/1/2012
End: 6/30/2013

Learning Outcome
Ability to Plan – Demonstrate the ability to develop a supervisory plan for classroom-based instruction.

Data Collection (Evidence)
1. Needs Assessment Project: Candidates will use the knowledge they will gain about assessment, data interpretation, and data analysis to address a problem in their school or district. The goal will be to show the ability to design, align, and evaluate curriculum and to guide professional learning.

2. The CUR 812 Comprehensive Assessment and Data Analysis Instructor will administer the project and grade it according to a rubric.

3. Mean scores and percent correct will be calculated for the total score and each section of the project.

Results of Evaluation
Analysis of Results:
Overall, the candidates are performing well on this assessment (88% average correct of total possible). The highest scores for this group were the Identify the Problem (96%) and the Describe Hunches & hypotheses sections (92%). The lowest scores were the Develop an action plan/implementation (76%) and the Narrative (85%) sections. These results are consistent with those from previous years.

Use of Evaluation Results
Recommended Changes Based upon this Analysis:
The new faculty member that will now teach this class will focus specifically on the aspects of the assignment with the lowest scores, including the Analyze multiple measures, the Develop an action plan/implementation (76%) and the Narrative (85%) sections. Examples of high quality work will be made available for students as well as direct instruction on these aspects of the assignment should result in improved scores next year.

Trends Noticed and Actions Based upon those Trends across the Year(s):
It is good to see that four of the seven areas assessed have increased since 2011. These most recent results align more closely with years past and are even higher in some cases. It is expected that the scores will stabilize and increase with the new faculty’s consistency and invested efforts of developing the course.

Related Items
GE 04: Inquiry and Technology
Use of Evaluation Results

Analysis of Results:

This course was revised in 2007. The changes made have been very positive and have allowed the instructor more control over projects candidates choose in the field. Candidates in AED 737 are much better prepared for the workload of this course if they were successful in AED 636.

The average for the mentor evaluations remains consistently high; therefore, program faculty are pleased with the field supervisors’ views of candidate performance. The quality of projects was outstanding. Candidates chose projects that were relevant to current issues and rated as highly applicable.

GE 08: Perspectives

GE 09: Cross-disciplinary Appreciation

EDD 05: LO Ability to Support Student Learning and Development

Start: 7/1/2012
End: 6/30/2013

Learning Outcome

Ability to Support Student Learning and Development –

Demonstrate ability to create and maintain a school culture which supports student learning and development.

Data Collection (Evidence)

1. The Curriculum Resource Unit (CRU) is a compilation of activities and materials on a particular curriculum topic or problem. The Curriculum Resource Unit is typically developed by a curriculum leader as a resource for teachers who want to create their own learning units on the topic. Contains suggestions and information that assist the teacher in supplementing the basic textbook in a course. The Curriculum Resource Unit has five components: (1) Introduction, (2) Instructional Goals, (3) Learning Activities, (4) Evaluation Techniques, and (5) References and Resources.

2. The Curriculum Resource Unit is an assignment in CUR 819 Curriculum Construction and Coordination, which is taught each summer.

3. Averages for each component will be calculated in order to provide diagnostic information.

Results of Evaluation

We’ve seen a sharp increase in the Instructional Goals section since last year, which is likely the result of a new instructor (now a faculty member). With this increase also came a decrease in scores on the learning activities.
**Use of Evaluation Results**

**Analysis of Results:**

The program faculty are satisfied with the scores overall, though there are areas in which we will focus for improvement. It is positive that one of the highest scores has been quite low for the past two consecutive years, so the change in scores was likely due to the change in faculty and will likely result in increased improvement over time due to instructor consistency and competence.

**Recommended Changes Based upon this Analysis:**

Direct instruction is needed on the references & learning activities, as students performed most poorly on these elements of the curriculum resource unit. Students should be informally pre-tested, should receive direct instruction at least twice with discussion included, and ongoing assistance should be provided as students complete the project so as to target improvement in this area. Learning activities are central to sound curriculum and lead the way to being able to identify whether students are successful in learning.

**Trends Noticed and Actions Based upon those Trends across the Years:**

Despite somewhat different group sizes, achievement is comparable across 2011 and 2012, with the only real change in three areas: instructional goals and learning activities. While the first of these areas' scores increased in 2012, the latter decreased. Otherwise scores were stable regardless of the group size.

Learning Outcome
Program Specific Content – Demonstrate mastery of the knowledge associated with content in Educational Leadership.

Data Collection (Evidence)

1. Comprehensive Examinations: Essay-style comprehensive examinations will be taken at the end of the program by all candidates and must be passed in order to earn the degree. Items will be based upon the School Leadership Licensure Assessment (SLLA) and scored by program faculty.

3. Mean scores, score distributions, and pass rates will be compiled annually. A 3-point scale of 0 – 2 is used, with an average of 1 required to pass the exam.

Results of Evaluation
In 2012, 11 candidates took comprehensive examinations. In the Spring, and 11 in the Summer and Fall. The average score was 1.40. The average scores on each question ranged from 1.0 (Q2) to 1.8 (Q4).

Data have been collected by question to provide diagnostic information. The overall average score of 1.40 was slightly lower than the overall average scores of 1.56 in 2009 and 1.50 in 2010.

Use of Evaluation Results
1. No specific trend was found when compared with scores from previous years.
2. Course content will be analyzed and emphasis will be placed in areas of weakness so that scores in all areas are in the acceptable range.

EDS-EAS 03: LO Ability to Plan

Start: 7/1/2012
End: 6/30/2013

Learning Outcome
Ability to Plan – Demonstrate the ability to develop a supervisory plan for classroom-based instruction.

Data Collection (Evidence)
1. The Curriculum Alignment Project will provide the candidate with experience working with the district level administrator in charge of curriculum and instruction. The candidate will plan and conduct a curriculum audit of a language arts at a designated grade level. The area to be addressed in the audit are:
   - Alignment between the local curriculum and the state framework
   - Alignment between the curriculum and instruction
   - Alignment of assessment to curriculum and instruction
2. The project will be completed in AED 736 Practicum II in School Administration, a practicum course. The course will be taught each Fall and Spring semester.
3. Range of scores and means will be calculated annually. The project is scored with a 5-point rubric: 5 – Exemplary 4 – Good, 3 – Acceptable, 2 – Fair, 1 – Poor.

Results of Evaluation
In 2012, 26 candidates completed the Curriculum Alignment Project. The average score for the project was 4.65 with the lowest score being 3.6 and the highest being 5.0. 12 candidates received a score of 5.0. The highest score was in Planning (4.73). The lowest scores were in Creativity (4.54), Compilation (4.54), and Impact on Student Learning (4.54).

Use of Evaluation Results
Faculty will review the assignment to address student weaknesses in Creativity, Compilation, and Impact on Student Learning. Course content will be reviewed to ensure that knowledge and skills related to management of a school or school district are addressed appropriately.

**EDS-EAS 05: LO Ability to Support Student Learning and Development**

**Start:** 7/1/2012  
**End:** 6/30/2013

**Learning Outcome**

**Ability to Support Student Learning and Development** – Demonstrate ability to create and maintain a school culture which supports student learning and development.

**Data Collection (Evidence)**

1. Curriculum Development Project: The project requires candidates to complete the following:
   - Purpose of curriculum design and delivery
   - Components and content of written curriculum
   - Curriculum and assessment development cycle

2. This project will be part of the requirements for CUR 703 Dynamic Leadership for Curriculum and Assessment.

3. Means and score distributions will be calculated.

**Results of Evaluation**

In 2012, 20 candidates completed the Curriculum Development Project. The scores ranged from 75 – 100, with a mean of 97.25 and a median and mode of 100.

2011 ratings were much higher than those of 2008, 2009, and 2010.

- GE 08: Perspectives
- GE 09: Cross-disciplinary Appreciation

EDS-EAS 06: LO Dispositions
Start: 7/1/2012
End: 6/30/2013

Learning Outcome
Dispositions – Demonstrate appropriate dispositions necessary for success as a school leader.
Data Collection (Evidence)
1. The graduate version of the Dispositions Rating Scale (DRS) will be administered to all candidates early in the program. Program faculty will use these to monitor candidate progress throughout the program. Any areas of weakness must be rectified before the candidate is eligible to sit for Comprehensive Examinations.

Dispositional characteristics assessed are as follows: fairness, the belief that all students can learn, professionalism, resourcefulness, dependability, commitment to inquiry.

The assessment uses a 4-point scale: 1 does not meet expectations; 2 meets a few expectations, but not sufficient; 3 meets expectations; and 4 exceeds expectations.

2. The DRS will be administered at full admission to the program. Faculty will review the DRS again when clearing the candidate to take the comprehensive examination.

3. Score ranges will be calculated.

Results of Evaluation
Nineteen candidates were reviewed at application to the comprehensive exam. No candidates received a rating below 3 (meets expectations).

The results are comparable to those of past years.

Use of Evaluation Results
1. It is recommended that the Dispositions Rating Scale be administered as a self-assessment in the CUR 701 Philosophy of Education. This will begin with the Fall 2012 semester. Faculty would review the self-assessment at application to the comprehensive examination, as well as reviewing any disposition flags for the student. Each student must be cleared before sitting for the comprehensive examination.

2. None at this time.

Related Items

- GE 08: Perspectives
- GE 10: Values

EDS-ELE 02: LO Demonstrate skill in verbal ability
Start: 7/1/2012
End: 6/30/2013

Learning Outcome
Demonstrate skill in verbal ability adequate for success in a graduate program

Data Collection (Evidence)
A satisfactory writing proficiency score must be submitted by the student during the first 12 hours of coursework in order to receive full admission. Candidates may choose one of the following assessments:
- CAAP – minimum score of 3
- GRE Writing – minimum score of 4.0
- MAT – minimum score of 30
- Praxis I Writing (PPST or CBT) – minimum score of 174
- NTE (Communication Skills) – minimum score of 653

Trends Noted
Performance on the comps has remained consistent for the Online & Tishomingo EdS students. Dissemination of a comps study guide began in 2011 to mirror the support offered to the MED candidates. The pass rate for the 2011 candidates was slightly less than the 2010 candidates but the number of 2011 candidates was greater. CSP 648 was added to the comps Fall 2012 to accommodate candidates who took it instead of CSP 616; however, no online candidates chose to respond to the CSP 648 prompt.

This was the first comps for Tishomingo EdS students. These students benefited from the dissemination of a comps study guide just like the other elementary graduate program students. Though they performed well on the exam, subsequent results will be monitored for trends.

Use of Evaluation Results
1. Response to the prompt for CSP 648 will be monitored to determine its usefulness.

2. Fall 2012 was the first comps for Tishomingo EdS students. Though they performed well on the exam, subsequent results will be monitored for trends.

Related Items
- GE 03: Quantitative Skills
Results of Evaluation

Twenty-three online candidates and 10 Tishomingo candidates gained full acceptance in 2012. Their Praxis writing scores ranged from 174-178. CAAP writing scores ranged from 3.4. NTE scores ranged from 653-674. All candidates demonstrated acceptable verbal ability.

Trends Noted

All candidates who gained full admission demonstrated verbal proficiency.

Use of Evaluation Results

1. Faculty agreed that 174 on the Praxis I Writing examination as opposed to requiring the score of 172 that is acceptable for licensure with the State Department of Education is more suitable for graduate students who must demonstrate a higher level of verbal proficiency.

2. The requirement for the 174 writing score will be maintained.

Related Items

- GE 02: Communication
- EDS-ELE 03: LO Demonstrate the ability to plan and support planning

Data Collection (Evidence)

1 & 2. In order to show that candidates in the Educational Specialist degree program in Elementary Education can plan and support planning at an advanced level of expertise, candidates in CEL 705 Practicum in Early Childhood Education and CEL 706 Middle Grades Practicum will plan and teach lessons based on a modified Graduate Teacher Work Sample that incorporates a research component for this advanced level of preparation. The first nine indicators of the Teacher Intern Assessment Instrument will also be used. CEL 705 Practicum in Early Childhood Education is taught the first semester of each academic year.

3. These sections of the Graduate Teacher Work Sample (TWS) will be used to show the ability to plan and support planning: Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction, Instructional Decision Making, and Design for Instruction in Elementary Education.

The assessment data in this area are related to the National Board of Professional Teaching Standards, Standard II (Knowledge of Content and Curriculum) and Standard VI (Meaningful Applications of Knowledge) for the middle childhood/generalist and Standard VI (Multiple Teaching Strategies of Meaningful Learning) for the early childhood generalist.

Results of Evaluation

Online candidates in CEL 706 demonstrated the ability to select developmentally appropriate objectives (96%); plan appropriate teaching procedures (100%); select a variety of appropriate materials and technology for lessons (100%); prepare appropriate assessment materials and procedures (100%); use assessment information (100%); use knowledge of students' background to make instruction relevant (100%); integrate knowledge from several subject areas (100%); incorporate diversity (100%); and use a variety of strategies to introduce and close lessons (100%).

Online candidates in CEL 705 demonstrated the ability to select developmentally appropriate objectives (100% met indicator); plan appropriate teaching procedures (97%); select a variety of appropriate materials and technology for lessons (93%); prepare appropriate assessment materials and procedures (90%); use assessment information (90%); use knowledge of students' background to make instruction relevant (90%); incorporate diversity (95%); and use a variety of strategies to introduce and close lessons (90%). The lowest rating was for candidates' ability to integrate knowledge from several subject areas (87%).

Tishomingo candidates in CEL 705 demonstrated the ability to select developmentally appropriate objectives (100% met indicator); plan appropriate teaching procedures (97%); select a variety of appropriate materials and technology for lessons (93%); prepare appropriate assessment materials and procedures (90%); use assessment information (90%); use knowledge of students' background to make instruction relevant (90%); incorporate diversity (95%); and use a variety of strategies to introduce and close lessons (96%).

Overall, the online candidates demonstrated the ability to plan effective lessons. Though not excessive, the lowest ratings were noted in the ability to integrate knowledge from several subject areas. Overall, the Tishomingo candidates demonstrated the ability to plan effective lessons. Their performance was comparable to their online peers.

Trends Noted

Past deficits in the selection of appropriate materials were addressed with increased student engagement in readings and research on the topic. The use of technology for lessons was a weakness in the past but is not noted as a weakness for a 2012 EDS. Deficits in opening and closing lessons were addressed in all EDS courses that required developing and implementing instruction. Consequently, no weaknesses were noted for the 2012 candidates.

Use of Evaluation Results

1. Revisit course content and experiences that involve integrating knowledge from several subject areas. Course instructors will engage online candidates in discussions about integrating subject areas.

Tishomingo instructors will use face-to-face class meetings to discuss best practices in planning effective lessons for diverse learners.

2. The Graduate Teacher Work Sample had been revised to make the use of technology a requirement. Further revisions were made and implemented Fall 2012 to clarify tasks and prompts and to offer candidates more direct explanations of expectations.

EDS-ELE 04: LO Demonstrate the ability to successfully teach in a field experience/clinical setting.

Start: 7/1/2012 End: 6/30/2013

Learning Outcome

Demonstrate the ability to successfully teach in a field experience/clinical setting.

Data Collection (Evidence)

1 & 2. Candidates in CEL 705 Practicum in Early Childhood Education and CEL 706 Middle Grades Practicum will teach a lesson that will be videotaped and assessed using a scoring guide.

3. A modification of the Graduate Teacher Work Sample incorporating parts of the Teacher Intern Assessment Instrument (TIAI) (indicators 10-34) will be used to collect data.

Results of Evaluation

Most candidates in CEL 705 Practicum in Early Childhood received either target or acceptable ratings in all areas of the TIAI (indicators 10-34). Candidates demonstrated their ability to use a variety of appropriate teaching strategies (2.8/3), use a variety of strategies to foster appropriate student behavior according to individual and situational needs (2.9/3), communicate assessment criteria and performance standards to the students (2.8/3), and develop and use a variety of formal assessments (cx. – pretests, quizzes, unit tests, rubrics, remediation, and enrichment activities) to differentiate learning experiences that accommodate differences in developmental and/or educational needs (2.9/3). Weaknesses were noted in the areas of using higher-order questions to engage students in analytic, creative, and critical thinking (2.5/3), provide learning experiences that accommodate differences in developmental and individual needs of diverse learners (2.4/3), and provide opportunities for the students to cooperate, communicate, and interact with each other to enhance learning (2.6/3).
All candidates in CEL 706-Practicum in Middle Level received target ratings in all indicators demonstrating professional knowledge and skills during clinical practice. All Tishomingo candidates in CEL 705-Practicum in Early Childhood received either target or acceptable ratings in all areas of the TIAI (indicators 10-34). Candidates demonstrated their ability to use a variety of appropriate teaching strategies (3/3 or 100%), provide learning experiences that accommodate differences in developmental and individual needs of diverse learners (3/3 or 100%), use instructional time effectively (3/3 or 100%), develops and uses a variety of informal assessments (3/3 or 100%), and develop and use a variety of formal assessments (3/3 or 100%). They also demonstrated the ability to use higher-order questions to engage students in analytic, creative, and critical thinking (2.9/3 or 97%).

Overall, the candidates demonstrated that they have the content and pedagogical content knowledge to implement effective instruction. CEL 705 candidates exhibited weaknesses in using higher-order thinking questions and accommodating student differences. Tishomingo candidates’ lowest rating was for using higher-order questions to engage students in higher-order thinking.

Trends Noted
Overall, candidates in both practicum experiences showed weakness in using higher-order questions.

Use of Evaluation Results
1. Discussions and activities that focus on questioning to facilitate students’ higher-order thinking abilities will continue be included in online practicum courses and the face-to-face class activities for the Tishomingo candidates.

Trends will be examined, especially for the prompts that require candidates to use higher level thinking skills.

2. Discussions and activities that focus on questioning to facilitate students’ higher-order thinking abilities will be included in the face-to-face class meetings for Tishomingo candidates and added to the online classes that involve lesson planning and teaching.

**Learning Outcome**
Demonstrate that candidate’s teaching has an impact on student learning and support of an environment that supports learning.

**Data Collection (Evidence)**
1 & 2. Candidates in CEL 705 Practicum in Early Childhood Education and CEL 706 Middle Grades Practicum will use student data from the Teacher Work Sample to demonstrate impact on student learning.

3. The Analysis of Student Learning sections of the Graduate Teacher Work Sample will be used to collect this data. This area is directly related to Standard III (Learning Environment) of the middle childhood/generalist standards for the National Board of Professional Teaching Standards.

**Results of Evaluation**
Most candidates in CEL 705-Practicum in Early Childhood demonstrated the ability to meaningfully interpret student data and draw appropriate conclusions. All (100%) candidates developed clear learning goals that aligned with national, state, and local standards. The learning goals were appropriate (2.73/3 or 91%) and represented variety in challenge levels (2.73/3 or 91%). The assessments were aligned with learning objectives and clearly stated performance expectations (2.93 or 98%). However, they lacked multiple modes (2.43 or 80%). Candidates demonstrated the ability to use a variety of instruction, activities, assignments and resources (2.6/3 or 87%) and used technology during instructional activities (2.8/3 or 93%). The lowest ratings were noted for the candidates’ ability to interpret data (2.2/3 or 74%) and demonstrate evidence of impact on student learning (2.3/3 or 78%).

In CEL 706- All (100%) candidates developed clear learning goals that aligned with national, state, and local standards. The learning goals were appropriate (3/3 or 100%) and represented variety in challenge levels (3/3 or 100%). The assessments were aligned with learning objectives (3/3 or 100%) and most candidates clearly stated the performance standards (2.8/3 or 95%). The assessments included multiple modes (3/3 or 100%). All candidates demonstrated the ability to use a variety of instruction, activities, assignments and resources (3/3 or 100%) and used technology during instructional activities (3/3 or 100%). The lowest ratings were noted for the candidates’ ability to interpret data (3/3 or 100%) and demonstrate evidence of impact on student learning (3/3 or 100%).

Most Tishomingo candidates in CEL 705-Practicum in Early Childhood demonstrated the ability to meaningfully interpret student data and draw appropriate conclusions. All candidates (100%) developed clear learning goals that aligned with national, state, and local standards. The learning goals were appropriate (3/3 or 100%) and represented variety in challenge levels (2.93/3 or 96%). The assessments were aligned with learning objectives and clearly stated performance expectations (2.73/3 or 96%). The assessments also demonstrated multiple modes (2.93 or 96%). Candidates demonstrated the ability to use a variety of instruction, activities, assignments and resources (3/3 or 100%) and used technology during instructional activities (3/3 or 100%). The lowest ratings were noted for the candidates’ ability to interpret data (2.2/3 or 73%) and demonstrate evidence of impact on student learning (1.93 or 63%).

**Trends Noted**
Beginning Spring ‘11, the TWS was modified to include more in-depth exploration of the community’s impact on contextual factors and task 6 of the TWS was modified to require candidates to analyze prescribed subgroups which reflect current classroom populations, assessments, and school district policies. Overall ratings for these areas were improved and remain strong. A 2012 review of Section 6 indicates candidates showed weaknesses in the ability to interpret the data and demonstrate evidence of their impact on student learning. This weakness will be addressed with modifying the sample section 6 of the TWS with an extended section on interpreting data and demonstrating evidence of impact on student learning.

Fall 2012 was the first iteration of CEL 705 for the Tishomingo candidates. Data will be watched for trends.

**Use of Evaluation Results**
1. Faculty discussed the rigor of this assessment in regards to the task that requires data analysis for subgroups. It was agreed that the all EDS candidates, including all off-campus programs, need to incorporate policies and community involvement and they need to complete this task with more in-depth analysis of student learning.

2. Section 6 of the EDS TWS sample was modified with an extended section on interpreting data and demonstrating evidence of impact on student learning.

### EDS-ELE 06: LO Demonstrate that candidate teaching reflects appropriate dispositions necessary for effective teaching.

**Start:** 7/1/2012  
**End:** 6/30/2013

**Learning Outcome**
Demonstrate that candidate teaching reflects appropriate dispositions necessary for effective teaching.

**Data Collection (Evidence)**
1. Candidates complete a Dispositions Portfolio prior to taking the comprehensive examination. The portfolio includes (1) completing the Graduate Dispositions Rating Scale as a self-assessment, and (2) the submission of artifacts to provide a rationale for the self-ratings given. The program coordinator uses a 4-point scale (1 low – 4 high) to assess the candidate’s
skill in providing a rationale for the self-ratings.

2. Data are collected in TaskStream.

3. TaskStream reports provide necessary statistical data for interpretation of the information.

National Board of Professional Teaching Standards, Standard II (Equity, Fairness, and Diversity) of the middle childhood/generalist area is directly related to dispositions.

Results of Evaluation
In 2012, candidate dispositions ratings revealed an average of 2.67/4 (66%) for fairness, 3.33/4 (83%) for the belief that all students can learn, 3.00/4 (75%) for professionalism, 2.67/4 (66%) for resourcefulness, 2.67/4 (66%) for dependability, and 3.00/4 (75%) for commitment to inquiry. The lowest ratings were for fairness, but the highest ratings were for the belief that all students can learn. According to candidate's self-ratings, most (96%) gave themselves "exceeds expectations" for fairness, belief that all students can learn, professionalism, resourcefulness, dependability, and commitment to inquiry.

Tishomingo candidate dispositions ratings revealed an average of 3.24/4 (80%) for fairness, 3.04/4 (83%) for the belief that all students can learn, 3.04/4 (82%) for professionalism, 3.00/4 (75%) for resourcefulness, 3.10/4 (77%) for dependability, and 3.20/4 (80%) for commitment to inquiry. The lowest rating was for dependability. According to candidate's self-ratings, most (92%) gave themselves "exceeds expectations" for fairness, belief that all students can learn, professionalism, and commitment to inquiry.

Overall, the evidence suggested the online and the Tishomingo candidates believed that all students could learn, they were professional, and were committed to inquiry.

Use of Evaluation Results
1. The document that lists examples of strong evidence for the dispositions will be revised and posted online as a resource.

2. Tips were added to the disposition rating scale information on the webpage for support as the candidates developed their portfolios. This document contained suggestions for demonstrating fairness. This area will continue to be watched.

**MAT 01: LO Demonstrate proficiency in basic pre-professional and content knowledge**

Start: 7/1/2012
End: 6/30/2013

Learning Outcome
Demonstrate proficiency in basic pre-professional and content knowledge, the Mississippi Department of Education requires for Alternate - Route Teacher Education candidates through the Master of Arts in Teaching Degree Program.

Data Collection (Evidence)
- 1 & 2. All MAT teacher candidates will be required to pass an essay-type comprehensive examination. The examination focuses on the planning, implementation, and assessment of teaching and learning. The examination will be administered during the spring semester of each academic year. Teacher candidates who do not pass all portions of the examination will be provided with study recommendations and will retake failed portions during the Summer I term of each academic year.

- 3. The rubric scoring criteria is represented by 1-Unacceptable, 2-Acceptable and 3-Target.

Results of Evaluation
100% of the Cohort VII candidates passed the comprehensive examination during the spring 2012 semester. The MAT candidates answered 5 questions submitted by three of their professors. The questions were generated from the following courses: CUR/CEL 611 – Classroom Management, CUR/CEL 612 – Development, Assessment, and Evaluation, CSP 546 – Advanced Survey of Exceptional Children, CUR/CEL 614 – Methods of Instruction, CML 509 – Technology in Education. Candidates must earn an average score of at least 2.00 to pass the exam. The overall average score for CUR/CEL 611 was 2.5, CSP 546 was 1.9, CEL/CSD 614 was 2.4, CUR/CEL 612 was 2.7, and CML 509 was 3.0.

Analysis of Results
The overall average for CSP 546: Advanced Survey of Exceptional Children was a 1.9. Over the last three years the CSP 546 data have declined. I recommend changes in content taught in the course to reflect an introduction of special education content that needs to be understood by a regular education teacher. None of the MAT candidates are special education majors; therefore, instead of advanced topics such as special education law and in depth special education theory, these candidates need to understand how to develop interventions for (Response to Intervention) RTI portfolios, the components of an IEP, how to build a working relationship with the inclusion teacher, and legal responsibilities of the teacher.

Trends Noted
The following chart shows the average for each course over three years of data.

<table>
<thead>
<tr>
<th>Cohort V</th>
<th>Cohort VI</th>
<th>Cohort VII</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEL/CUR 611</td>
<td>2.37</td>
<td>2.2</td>

<tr>
<td>CSP 546</td>
<td>2.37</td>
<td>2.2</td>
</tr>
<tr>
<td>CEL/CSD 614</td>
<td>2.12</td>
<td>2.35</td>
</tr>
<tr>
<td>CUR/CEL 612</td>
<td>2.6</td>
<td>2.78</td>
</tr>
<tr>
<td>CML 509</td>
<td>2.5</td>
<td>2.57</td>
</tr>
</tbody>
</table>

The results for most of the courses have increased or at least maintained steady except for CSP 546. As you can see, CSP 546 has continued to decline. I will compare the results for the spring 2013 comprehensive finals and discuss making changes to the content taught in CSP 546 to make it more meaningful for the MAT candidates.

Use of Evaluation Results
1. This is the fourth year that the MAT comprehensive examination has been given. The exam is given during the spring semester usually in April close to the end of the program. The results are shared with the candidates, the other MAT instructors, the chair and the registrar because the candidates must pass the comprehensive final to be eligible for graduation.

2. I recommend changes be made to the content taught in CSP 546 for the MAT candidates to reflect topics that will be addressed by the new regular education teacher. I would like to see the class focus on introductory special education topics rather than advanced topics. I plan to work with the instructor of the course before the summer 2013 class is taught to discuss these concerns.

**MAT 02: LO Demonstrate the ability to plan and implement instruction that meets the needs of diverse learners in the classroom setting.**

Start: 7/1/2012
Learning Outcome
Demonstrate the ability to plan and implement instruction that meets the needs of diverse learners in the classroom setting.

Data Collection (Evidence)
1. During the CEL/CUR 650 Dimensions of Learning/Internship candidates will be evaluated on their ability to plan instruction using Domain I: Planning and Preparation of the Teacher Intern Assessment Instrument (TIAI) for spring and fall 2011. The instrument is used statewide to measure teacher candidates’ abilities. The Cohort VI and Cohort VII candidates were trained on this instrument during their first semester in the program.

   Each candidate’s skills are evaluated a minimum of three times in his/her classroom.

2. A 3-point rubric is used to assess Teacher Intern Assessment Instrument (0 – 3) indicators.

3. TaskStream reports provide descriptive statistical analyses.

Results of Evaluation
TIAI Indicators in Domain I: Planning and Preparation assess the candidate’s ability to plan instruction. Each candidate is evaluated three times during the fall semester and three times during the spring semester of their internship. The TIAI instrument was revised during the summer of the 2012. A score of “2” is acceptable and a score of “3” is target. In the spring of 2012 Cohort VII was assessed using this instrument, and in the fall of 2012 Cohort VIII was assessed using this instrument. The average raw score for each indicator is closely related across the different cohorts of students. The one indicator that concerned me for the fall was indicator 8: Incorporates diversity, including multicultural perspectives, into lessons. The spring cohort scored a 2.12 whereas the fall cohort scored a 1.20. Cohort VIII performed in the emerging category for this indicator. The spring students are in their second semester of teaching while the fall students are in their first semester of teaching. I plan to stress the importance of incorporating diversity in lessons in our Saturday classes during the spring. Other than this one instance, all other indicators show students performing in the acceptable range for the ability to plan section of this instrument.

Analysis of Results:
Indicator 8: Incorporates diversity, including multicultural perspectives, into lessons has been one of the weakest areas for the MAT teachers to incorporate into their planning.

Indicator 7: Integrates knowledge from several subject areas in lessons is the next weak area that needs to be explicitly addressed in the program. All indicators show students performing in the acceptable range for the ability to plan section of this instrument except for the fall 12 students in indicator 8. The MAT candidates need more concrete examples of how to incorporate diversity and to teach across the curriculum in their lessons. I need to examine the summer methods course that all of the students are required to take to plan assignments focusing on these areas explicitly.

Trends Noted
There has been a trend over the last three fall semesters starting with Cohort VI-Cohort VII of a decline in ratings for indicators 3, 7, and 8. The ratings are as follows: Indicator 3: 2.88, 2.63, 2.49; Indicator 7: 2.30, 2.46, 2.09; and Indicator 8: 1.20, 2.09. As the MAT coordinator, I need to make sure that when the students are learning to write lessons plans that they are incorporating a variety of materials, incorporating diversity, and teaching across the curriculum. All of these indicators can be related in the development of the lesson. I need to model how to develop a more in-depth teaching unit in the student’s portfolio. These changes will happen in the methods of teaching course, CEL/CSID 614.

Use of Evaluation Results
1. The data are stored in TaskStream for analysis. Each candidate is evaluated three times during the fall semester and three times during the spring semester of their internship. The results are posted for the candidate.

2. Recommended changes would be to explicitly provide assignments in the methods of teaching class, CEL/CSID 614 during the summer II session, that demonstrate/model how to incorporate diversity and teaching across the curriculum in their lesson plans.

MAT 03: LO Demonstrate the ability to complete a successful internship.
Start: 7/1/2012
End: 6/30/2013
Learning Outcome
Demonstrate the ability to complete a successful internship.

Data Collection (Evidence)
1. The MAT Program includes a year-long internship in the field. During the CEL/CUR 650 fall and spring courses candidates will be evaluated three times each semester by a university supervisor using the Teacher Intern Assessment Instrument (Cohort VI during spring 2011 and Cohort VII during fall 2011)

2. A 3-point rubric is used to assess Teacher Intern Assessment Instrument (0 – 3) indicators. Data are collected in TaskStream.

3. Descriptive statistics will be calculated in TaskStream.

Results of Evaluation
The Teacher Intern Assessment Instrument (TIAI) from the Mississippi Department of Education is designed to assess the performance of teacher candidates within the following five domains associated with effective teaching practices: 1) Planning and Preparation (Indicators 1-9 not included in this assessment); 2) Communication and Interaction (Indicators 10-15); 3) Teaching for Learning (Indicators 16-23); 4) Managing the Learning Environment (Indicators 24-29); and 5) Assessment of Student Learning (Indicators 30-34). It contains 34 indicators that are referenced to Interstate New Teacher Assessment and Support Consortium (INTASC) Principles. The TIAI is used to assess the candidates’ performance during key field experiences in methods courses and during internship. Indicators 10-34 assess the candidate’s knowledge of clinical practice in the domains 2-5 introduced above. Overall, the candidates performed in the “acceptable” range of the instrument, but the lowest rated indicators were # 22: Uses higher order questions to engage students in analytic, creative, and critical thinking; # 23: Uses family and/or community resources (human or material) in lessons to enhance student learning, and # 30: Communicates assessment criteria and performance standards to the students. In Spring 2012, Cohort VII (2nd semester of internship) scored an average of 2.63 while in fall 2012, Cohort VIII (1st semester of internship) scored an average of 1.78.

Analysis of Results:
TIAI #23: Uses family and/or community resources (human or material) in lessons to enhance student learning, and # 30: Communicates assessment criteria and performance standards to the students. The weakest area for these candidates was indicator 23. "Uses family and/or community resources in lessons to enhance student learning. The average ratings are in the “acceptable” range, but continue to be the weakest area for students.

Trends Noted and Actions Based upon those Trends across the Year(s):
The weakest area for these candidates was indicator 23, “Uses family and/or community resources in lessons to enhance student learning. The average ratings are in the “acceptable” range, but continue to be the weakest area for students.
Use of Evaluation Results
1. The data are stored in TaskStream for analysis. Each candidate is evaluated three times during the fall semester and three times during the spring semester of their internship. The results are posted for the candidate.

Community resources may not be available for the candidates, therefore, being creative in developing lessons should be the focus.

2. Examples of how to incorporate family and community resources will be a primary focus when teaching students how to develop teaching units in their methods classes and during their internship.

**MAT 04: LO Demonstrate the ability to measure student achievement, employ classroom management, and adjust instruction for maximum impact on student learning.**

**Start:** 7/1/2012

**End:** 6/30/2013

**Learning Outcome:** Demonstrate the ability to measure student achievement, employ classroom management, and adjust instruction for maximum impact on student learning.

**Data Collection (Evidence):**
1. All candidates in Cohort VI successfully completed the Graduate Teacher Work Sample in CEL/CUR 650 Dimensions of Learning/Internship during the Spring 2011 semester.

During the Fall 2010 CEL/CUR 650 Dimensions of Learning/Internship course, Cohort VI candidates were given an opportunity to discuss, implement, and reflect on the seven components of the Teacher Work Sample through blackboard assignments which provided a deeper understanding of how the components promote differentiated instruction and effective teaching practices. They completed the Graduate Teacher Work Sample folio in Spring 2011.

During the Fall 2011 CEL/CUR 650 Dimensions of Learning/Internship course, the candidates in Cohort VII were given an opportunity to discuss, implement, and reflect on the seven components of the Teacher Work Sample through blackboard assignments which provided a deeper understanding of how the components promote differentiated instruction and effective teaching practices.

The Graduate Teacher Work Sample (TWS) folio contains the following components: Contextual Factors, Learning Goals, Assessment Plan, Decision for Instruction, Instructional Decision-Making, Analysis of Student Learning, Reflection and Self-Evaluation, Design for Instruction in Elementary/Secondary Education, and Research-Based Practice.

2. A 3-point rubric is used (1 – indicator not met, 2 – indicator partially met, 3 – indicator met). Data are collected in TaskStream.

3. Descriptive statistics will be calculated using TaskStream.

**Results of Evaluation:**
Since the beginning of the program, candidates in the MAT Program have been introduced to Teacher Work Sample (TWS) methodology during one of the first courses taken in the program, CEL/CUR 612, Development, Assessment, and Evaluation. The candidates are required to complete the TWS assessment based on hypothetical data in preparation for implementation during CEL/CUR 650, Dimensions of Learning/Internship. For each experience, the teacher candidate must complete a teaching unit of integrated study according to the Teacher Intern Assessment Instrument (TIAI) indicators, and develop a corresponding TWS. In completing the TWS, candidates address a total of eight components, seven of which deal with teaching processes identified by research and best practice as fundamental to improving student learning. Based on course evaluations, TWS needs to be addressed in a different course other than CEL/CUR 612. TWS data is only collected during the spring semester of the student’s internship. In the past only the final submission of TWS was logged in TaskStream.

Because this information does not discriminate, the candidates are required to upload the first submission and final submission after corrections, which started with Cohort VII in Spring 2012. As you see, contextual factors and the assessment plan are the sections of TWS that need to be addressed in-depth during the summer and fall courses.

**Analysis of Results:**

<table>

</tbody>
</table>

The weakest areas of TWS are in Contextual Factors and the Assessment Plan sections of the instrument. The data show growth between the first and final submissions, but still these two are the weakest. Plans to restructure how and when the content is taught over the summer will be implemented summer 2013. During CEL/CUR 612, an in-depth study of assessment will be taught in regards to planning lessons and the contextual factors of students that drive instruction. In CEL/CUR 614, an in-depth study of lesson planning and TWS will be linked to the assessment course and carried through the students assignments during their fall and spring internship.

**Trends Noticed and Actions Based upon those Trends across the Year(s):**

Students have been successful with this assessment, but according to course evaluations from the CEL/CUR 612 course, the TIAI unit planning and TWS need more time spent on the introduction during the summer. During the summer of 2013, TIAI/TWS will be moved to CEL/CUR 614, Methods of Teaching, to allow that unit to be carried into the students internship for the fall and spring and to provide more in-depth teaching of the TWS components. Also, the first draft and final draft submission in TaskStream show the improvements over the spring semester for this assessment.

**Use of Evaluation Results:**
1. Faculty will meet to discuss revisions of Teacher Work Sample (TWS) to reflect the teachers’ ability to plan for diverse students. The data are stored in TaskStream for analysis.
2. During the summer of 2013, Teacher Intern Assessment Instrument (TIAI)/TWS will be moved to CEL/CSD 614, Methods of Teaching, to allow more time for the development of the teaching unit and TWS. The students will continue developing a unit that they can use during their internship for the fall and spring. By rearranging how and when the content is taught during CEL/CUR 612 and CEL/CSD 614 during the first summer courses of the program, the intent is to allow more in-depth teaching of the components for TWS and lesson planning.

**MAT 05: LO Demonstrate the ability to identify and develop the professional dispositions of an effective educator.**

**Learning Outcome**
Demonstrate the ability to identify and develop professional dispositions of an effective educator.

**Data Collection (Evidence)**
1. The graduate version of the Dispositions Rating Scale (DRS) will be used to assess candidates’ professional dispositions in CEL/CUR 650 Dimensions of Learning/Internship for both fall and spring sections. The rating scale is based on six indicators: Fairness, The belief that all children can learn, Professionalism, Resourcefulness, Dependability, and Commitment to inquiry.

2. A 4-point rating scale is used (1 - Does not meet expectations, 2 - Meets a few expectations, but not sufficient, 3 - Meets expectations, 4 - Exceeds expectations). Data are collected in TaskStream.

3. TaskStream reports provided descriptive statistical analyses.

**Results of Evaluation**
Cohort V-VII were evaluated using a 4.00 scale, but Cohort VIII was evaluated using a 3.00 scale.

</table>

**Analysis of Results**
The alternate-route candidates already hold a bachelor’s degree in non-teaching and some are older than the average traditional route candidate for initial teacher licensure. Most have had experience in the workforce and understand the importance of being resourceful, fair, and dependable. The results of these data show those qualities throughout the Cohorts. In some instances, the candidates were more critical of themselves than the instructor was for each of these descriptors. For Cohorts V-VII a score of 3.00 means expectation, but a score of 4.00 exceeds expectations.

| (1) | 1 - Does not meet expectations |
| (2) | 2 - Meets a few expectations, but not sufficient |
| (3) | 3 - Meets expectations |
| (4) | 4 - Exceeds expectations |

Starting with Cohort VIII, the rubric was revised to reflect the following ranges:

| (0) | 1 - Does not meet expectations |
| (1) | 2 - Meets expectations |
| (2) | 3 - Exceeds expectations |

The candidates demonstrate the knowledge and readiness to engage in professional experiences, demonstrate commitment, hold high but realistic expectations for students, are committed to developmentally responsive and socially equitable teaching and learning, realize the importance of connecting curriculum and assessment that accommodates and supports the learning of all young adolescents, work with others, and identify opportunities for collaboration and leadership.

Annual Report_AY2013_Teacher Education, Leadership and Research 26 of 89
Trends Noted

Overall the students meet expectations across the Cohorts. The students demonstrated the knowledge and readiness to engage in professional experiences.

Use of Evaluation Results

1. The data are stored in TaskStream for analysis. During the fall and spring semesters as part of their internship, the students either evaluate themselves using the six-item dispositions rating scale and/or the instructor evaluates the students using the instrument. The results are posted for the candidates and are attached.

2. Over the last four years, we have not been consistent on collecting data from a student self-assessment and/or from the teacher assessment using this instrument for the program. One program change needs to be that each semester, fall and spring, the student should complete the self-assessment. The data could be analyzed over time during a candidates’ internship to determine professional growth as a result of the experiences within the program.

MED-EAS 01: LO Content and Pedagogical Content Knowledge

Start: 7/1/2012
End: 6/30/2013

Learning Outcome

Content and Pedagogical Content Knowledge – Demonstrate mastery of the knowledge with both the content and pedagogy of the Master's in Educational Leadership program by passing the School Leaders Licensure Assessment (SLLA).

Data Collection (Evidence)

1.a. Institutional reports and individual reports for the School Leaders Licensure Assessment (SLLA) will be used.

This assessment is a national, norm-referenced examination and the passage of it is required to receive a license as a school administrator in the state of Mississippi. It is based on the Interstate School Leaders Licensure Consortium (SLLC) standards that closely align with Educational Leadership Constituent Council.

2.a. The School Leaders Licensure Assessment will be taken by all candidates near the end of their program.

3.a. Scores are sent from Educational Testing Service to Delta State University each year. Overall mean and median scores and score distributions will be calculated, as well as percent correct on each section of the assessment.

3.b. Mean scores and standard deviations will be calculated for the total and each section.

Results of Evaluation

Cohort XIV: School Leaders Licensure Assessment Performance

Five out of the Eight members of Cohort XIV passed the School Leadership Licensure Assessment (SLLA) examination on the first attempt; the other three passed on the retake.

<td>84%</td>
<td>N/A</td>
</tr>
</tbody>
</table>

There has been a steady increase in the MS pass rate over the three year accounting period. After reviewing and comparing results of both Cohorts XII and XIV, it should be noted that the mean score dipped a little (176.81/168.92); the median score appears to be in range with national scores based on previous national assessment scores.

It should be noted that Mississippi's passing scale score of 169 is the highest among all states in the nation that use the School Leadership Licensure Assessment as an exit and licensure exam for school principal/administration candidates.

Use of Evaluation Results

1. The content and format for the School Leadership Licensure Assessment has changed. The Delta State University Leadership Cohort curriculum was redesigned in May 2011 and was used during the current year for Cohort XIV. However, it is recommended that program assessments be increased and that a multiple choice format test be administered for each unit or semester of content to align with the Educational Leadership Constituent Council / Interstate School Leaders Licensure Consortium standards. Additional focus should be placed on identifying and connecting standards to questions, multiple choice and constructed responses.

2. A new coordinator and support teacher has been hired and a focus on stability regarding leadership for the program has been made.

Related Items
- GE 03: Quantitative Skills

MED-EAS 02: LO Program Specific Content

Start: 7/1/2012
End: 6/30/2013

Learning Outcome

Program Specific Content –

Demonstrate mastery of the knowledge associated with content in Educational Leadership. Show mastery of the knowledge associated with content in Educational Leadership by responding to Interstate School Leader Licensure Consortium/Educational Leadership Constituents Council standards, analyzing data, and constructed appropriate responses on the comprehensive exam.

Data Collection (Evidence)

1. & 2. All candidates for the Master of Education degree in Educational Leadership take a Comprehensive Examination at the end of the spring semester each year. The examination was constructed by faculty and was formatted like the School Leaders Licensure Assessment requiring the candidate to construct written responses to stimulus materials. The comprehensive examination consisted of three sections: Five vignettes which required evaluation of actions (Section I), one case analysis which required synthesis and problem solving (Section II), and three documents which required analysis of information and decision making (Section III). The examination stimulus materials are developed to reflect situations and
issues of current educational leadership practice and each item assesses multiple Interstate School Leaders Licensure Consortium/ Educational Leadership Constituent Council standards. A rubric for each item was developed collaboratively by the faculty and used to score candidates’ responses consistently. Each of the five vignettes and the three documents were scored 2, 1 or 0 based on the individual rubric for each. The case, which required synthesis of information from a scenario and five documents, was scored 3, 2, 1 or 0.

3. An Excel spreadsheet will be used to analyze the results.

Results of Evaluation
Seven (7) out of eight (8) candidates passed the comprehensive examination on the first try by scoring 70% or above.

In 2012, the report consists of 8 students taking the exam. The average score was 1.71. The scores ranged from 1.25-1.96. The overall mean score for Cohort XIV in May 2011 was 14.22 with a standard deviation of 2.22. All candidates passed the exam during the first administration by scoring 70% or above.

Trends Noted
The overall average score has risen from 1.22 in 2011, to 1.71 in 2012.

Annual Report_AY2013_Teacher Education, Leadership and Research
Use of Evaluation Results

1. More emphasis will be placed on analyzing and synthesizing information and documents required for effective decision making. Ideally, the comprehensive exam should mirror and perhaps include multiple choice as well as constructed response. Educational Testing Services has revised School Leadership Licensure Assessment administration dates to mid-April and mid-July. Consideration should be given to moving the Comprehensive Examination to early April since the program will be ending June 30.

2. The faculty plans to continue the process of individual assistance and requiring resubmission of assessments that do not meet a proficient rating on Educational Leadership Constituent Council standard elements assessed by this project.

Additionally, the program coordinator and teaching faculty should attempt to place candidates at internship sites where the mentor or lead teacher is skilled in data analysis and improvement planning.

Trends Noted

This is the first major individual project for candidates. Due to the emphasis on data analysis for school improvement, this project is a first assessment, but several candidates usually need remediation and continued instruction. For the past three years we have increased the amount of direct instruction and practice in analysis of test scores prior to the project assignment and required remediation and resubmission of projects that did not meet proficiency on the Educational Leadership Constituent Council standards assessed by this project.

**Related Items**

- **GE 03: Quantitative Skills**

**MED-EAS 03: LO Ability to Plan**

Start: 7/1/2012

End: 6/30/2013

Learning Outcome

 Ability to Plan –

Demonstrate the ability to develop a supervisory plan for classroom-based instruction.

Develop and implement a supervisory plan for classroom-based instruction utilizing the supervisory clinical cycle process.

Evaluate, discuss, present, and reflect on the process.

**Data Collection (Evidence)**

1. Ability to Plan: Data Analysis Project: Candidates will complete this multi-layer project during their program in phases using actual data from K-12 schools.

2. Data will be collected by program faculty.

3. A 4-point scale will be used to rate the project. Ratings will be aligned with appropriate Educational Leadership Constituent Council (ELCC) professional standards

**Results of Evaluation**

Cohort XIV (2011-12)

Mean: 1.8

SD: 3.51

N = 8

For each of the three major components in the Data Analysis/School Improvement Project, the data collection, analysis, and interpretation component (ELCC 2.3) revealed the most significant candidate weakness for all three cohort groups, Cohort 12, 13, and 14. Only one candidate from each cohort group received a 2 or below on the presentation component of the project.

All candidates were provided individual remediation and allowed to resubmit the project with the required and suggested changes in order to meet the standards. Additionally, all candidates presented their results to their respective school faculties and also to the Educational Leadership Cohort. Each candidate was required to submit a follow-up to this project that recommended additional changes to improve the project. The developing scores did not pose an issue due to the fact this was the first major project for all the candidates and many of the components of the project depended on the expertise of the field experience mentor as well. All candidates to date have demonstrated proficient or exemplary on all Educational Leadership Constituent Council standards to date.

**Trends Noted**

This is the first major individual project for candidates. Due to the emphasis on data analysis for school improvement, this project is a first assessment, but several candidates usually need remediation and continued instruction. For the past three years we have increased the amount of direct instruction and practice in analysis of test scores prior to the project assignment and required remediation and resubmission of projects that did not meet proficiency on the Educational Leadership Constituent Council standards assessed by this project.

**Use of Evaluation Results**

1. The faculty plans to continue the process of individual assistance and requiring resubmission of assessments that do not meet a proficient rating on Educational Leadership Constituent Council standard elements assessed by the project.

2. Faculty continues to focus on the use of data analysis in decision making and improvement planning. Candidates tend to continue to grow in this area throughout the year.

MED-EAS 04: LO Clinical Practice

Start: 7/1/2012
End: 6/30/2013

Learning Outcome

Clinical Practice –
Demonstrate the knowledge, skills, and dispositions necessary for a school leader while in the field.

While in the field, demonstrate the knowledge, skills, and dispositions necessary for a school leader by engaging, analyzing, correlating, implementing standards in meaningful, realistic activities.

Data Collection (Evidence)

1. Clinical Practice: Intern Performance Assessment: Mentors in the field will evaluate interns during their three internships.

2. Mentors will submit assessments to program faculty during each of the internships. Data from Internship 1 will be considered formative in nature and are not reported.

3. The assessment will be based on a 4-point rating scale. Percents are calculated for each point of the scale and are aligned with appropriate Educational Leadership Constituent Council professional standards.

Results of Evaluation

Data shows students did not do well in their first internship as is true with past Cohorts. Cohort 14, however, did slightly worse than Cohort 13 with a 88% Exemplary/Proficiency rating. Cohort 13 had a 89% rating.

Analysis of ratings by standard for all internship experiences revealed all of the candidates of Cohort XIV were rated at or above expectations for each Educational Leadership Constituent Council standard assessed. At the end of Internship 3, all candidates were rated above expectations on all standards with the exception of a few mentors noting unable to rate Standards 2.4, 3.3, 4.2, and 4.3. Historically these items have been difficult to rate or rated lower than others by site mentors because it is difficult for interns to gain significant amounts of experiences during any one internship (12 weeks) in promoting community involvement in the community, managing fiscal, human and material resources, and mobilizing community resources. The overall mean scores (Internship 1, 2, & 3) for Cohort XIV on each Educational Leadership Constituent Council standard across ranged from 3.56 to 4.0 indicating an above average performance as a group on the indicators. Summaries of performance on the Intern Performance Assessments are shown in tables below.

Use of Evaluation Results

1. Continue to emphasize to the mentors the importance of fairness and consistency in rating the interns on their performance.

2. Examine the internship activities outlined for the internships to see if there are other specific activities that could be added to increase experiences related to Educational Leadership Constituent Council standards 2.4, 3.3, and 4.3.

**MED-EAS 05: LO Ability to Support Student Learning and Development**

Start: 7/1/2012
End: 6/30/2013

**Learning Outcome**

**Ability to Support Student Learning and Development**

Demonstrate ability to create and maintain a school culture which supports student learning and development.

Respond to Interstate School Leader Licensure Consortium/Education Leadership Constituents Council standards by answering questions appropriately which identify and analyze the ability to create and maintain a school culture which supports student learning and development.

**Data Collection (Evidence)**

1 & 2. The Educational Leadership Preparation Program Questionnaire (ELPPQ) is used as an exit survey. The questions are based upon the national standards for the Educational Leadership Constituent Council Standards. Eight items are related with a 4-point scale; three items are open response.

**Use of Evaluation Results**

1. Continue to emphasize to the mentors the importance of fairness and consistency in rating the interns on their performance.

2. Examine the internship activities outlined for the internships to see if there are other specific activities that could be added to increase experiences related to Educational Leadership Constituent Council standards 2.4, 3.3, and 4.3.

**MED-EAS 05: LO Ability to Support Student Learning and Development**

Start: 7/1/2012
End: 6/30/2013

**Learning Outcome**

**Ability to Support Student Learning and Development**

Demonstrate ability to create and maintain a school culture which supports student learning and development.

Respond to Interstate School Leader Licensure Consortium/Education Leadership Constituents Council standards by answering questions appropriately which identify and analyze the ability to create and maintain a school culture which supports student learning and development.

**Data Collection (Evidence)**

1 & 2. The Educational Leadership Preparation Program Questionnaire (ELPPQ) is used as an exit survey. The questions are based upon the national standards for the Educational Leadership Constituent Council Standards. Eight items are related with a 4-point scale; three items are open response.
3. Score distributions will be calculated for the eight items using the 4-point scale. Themes are identified in the open response items.

Results of Evaluation
Cohort XIV members (n = 8)

The exit survey results reveal that candidates rate themselves highest in the areas of school culture (Standard 2), ethics (Standard 5), vision (Standard 1), and program experiences being designed to accommodate students’ individual needs (Question 8).

In all three cohort groups, (12, 13, and 14) the two areas identified by graduates as consistent strengths in the program and their own knowledge, skills, and dispositions were Item #2 (ELCC Standard 2 – Promoting a positive school culture) and Item #5 (ELCC Standard 5 - Acting with integrity, fairly, and ethically). Program candidates in all three cohorts scored two areas consistently weaker than others: Item #4 (ELCC Standard 4 – Collaborating with families and communities) and Item #6 (ELCC Standard 6 – Larger context of the school) were both lower than any of the eight other items on the survey; however, the mean scale score in all three cohort groups was above 3.00 (average). Other areas all scored consistently above 3.50.

Cohort members also responded to three open-response questions, one identifying program strengths, a second identifying needed program improvements, and a third for additional comments. Strands across the responses included the following:

Strengths:
- The internships’ greatest strengths are in providing valuable lessons and “on the job” training and observation, and ability to build a network of colleagues.
- Opportunities provided in program to attend ASCD or national conference, and have outside speakers come into class to share in the instructional process.
- Clinical correlations, required readings, various projects required provide experiences that connect theory and practice.

Ways Program could be improved:
- Build in more content to prepare cohort members for job interviews.
- Have adequate faculty to facilitate courses and give feedback in a timely manner.
- Prepare students for School Leadership Licensure Assessment yearlong, not just weeks before the test.
- Help us develop a better understanding of research and statistics when that outside core course is taken.
- Have more outside experts come in to teach topics such as school finance, school law, etc.
- Continue formal mentoring with program graduates for a year or two after completion.
- Select committed instructors.

Use of Evaluation Results

1 & 2. All activities included under strengths were continued as important components in the Program Redesign.

Faculty have included more activities/scenarios similar to the School Leadership Licensure Assessment for candidates throughout the next program year. A school law expert was used as a resource to provide training for candidates in school law.

College of Education should consider ways to support Cohort Instructors to ensure they meet the needs of candidates. Program faculty should consider how to assist candidates with research and statistics content as required as a core course by the College of Education and make it relevant in the program. Faculty should consider whether to continue the one-week Central Office Internship as part of the program since redesign has reduced the number of courses in the program and this time might be better spent in classwork.

Starting with Cohort 15, this has been integrated into each Internship.

Continue to use outside experts to teach specific units as funding allows and continue to investigate ways on-going mentoring can be provided to program graduates.

MED-EAS 06: LO Exit Portfolio

Start: 7/1/2012
End: 6/30/2013

Learning Outcome

Exit Portfolio –

Demonstrate the effective administrative content knowledge and skills expected of program completers.

Create a portfolio measuring and supporting effective administrative content knowledge and skills expected of program completers. The portfolio must incorporate activities demonstrating active engagement in all Interstate School Leader Licensure Consortium/Education Leadership Constituents Council standards.

Data Collection (Evidence)

1 & 2. The Exit Portfolio is the culminating assessment for candidates completing the program. The purpose of the assessment is to provide an opportunity for the candidate to reflect on his/her learning and growth across the program of study and produce a professional document that provides substantial evidence of the learning and growth. The Exit Portfolio contains five sections: I. Vita, II. Self-assessment related to ISSLC Standards, III. Summary of field experiences, IV. Situational Analysis of learning obtained from completing clinical correlations, V. Samples and artifacts of other meaningful work.

3. A 4-point rubric is used: 1 – Rudimentary (poor), 2 – Developing (fair), 3 – Proficient, 4 – Exemplary

Results of Evaluation

The exit portfolio results reveal that candidates generally gather great evidences throughout the program taking the time to appropriately align artifacts to the ISSLC/ELLC standards accordingly.

The minimum acceptable score on the Exit Portfolio for a candidate to obtain a passing score is 28 (70%) out of a possible 40 points. One candidate from Cohort 11, one from Cohort 12 and two from Cohort 14 did not meet the standard for a passing score on the first attempt. All were successful on the second attempt.

For the 2011-12 program year, student overall scores increased from the previous year. All students scored “exemplary” on Field Experiences. One student had to resubmit the Exit Portfolio.

A summary of performance of candidates in Cohort XIII is shown in tables below.

Candidates showed a particularly strong performance in the areas of Field experiences and Artifacts & Samples which can be correlated with the three twelve-week internship experiences each candidate received while in the program. Each candidate was able to submit and justify artifacts and samples to support the work in their Exit Portfolio; this was an area in which it was expected that candidates would demonstrate strength since various work samples were required at various points during each internship.

Candidates often show a strong trend in analysis of performance in-field-based situations, but sometimes are inconsistent in their abilities to identify the connection between the theory or practice and the specific Educational Leadership Constituent Council Standards and elements involved.

Cohort XIV Summary of Performance on Exit Portfolio
Use of Evaluation Results

1 & 2. Continued emphasis will be placed on analyzing, synthesizing, and interpreting each Educational Leadership Constituent Council Standard so that candidates can better understand and recognize the standards in practice. Candidates often show a strong trend in situational analysis and how to perform in certain field-based situations, but sometimes are inconsistent in their abilities to make connections with a specific Educational Leadership Constituent Council Standard and elements.

- GE 03: Quantitative Skills
- GE 04: Inquiry and Technology

MED-EAS 07: LO Dispositions

Start: 7/1/2012
End: 6/30/2013

Learning Outcome

Dispositions

Demonstrate appropriate dispositions necessary for success as a school leader.

Select and justify appropriate dispositions necessary for success as a school leader.

Data Collection (Evidence)

1 & 2. The Dispositions Rating Scale (DRS) will be completed by all candidates as a self-assessment during the first 12 hours in the program. The professor in EDL 602 Foundations II: Instructional Leadership Practices will also complete an evaluation of each student at that time. Program faculty will use these to monitor candidate progress throughout the program.

Dispositional characteristics assessed are as follows: fairness, the belief that all students can learn, professionalism, resourcefulness, dependability, commitment to inquiry.

The assessment uses a 4-point rating scale. The appraisal scale is: 1, does not meet expectations; 2, meets a few expectations, but not sufficient; 3, meets expectations; and 4, exceeds expectations.

3. Mean scores on each dispositional characteristic will be calculated.

Results of Evaluation

Data was assessed for eight candidates from Cohort 14. Students' overall rating of 2 (meets a few expectations) was based on initial rankings as they are newly exposed to the program. A comparison was made with Cohort 14's entrance data during EDL 602 and exiting data collected showed no one's average score was below a rating of 3 (meets expectations).

The results were compared to those of past years.

A trend of candidate growth is displayed in the data for candidates from the beginning of the Cohort Program until the end.

Self-Assessment - As a group, the candidates' ratings were varied with "Belief that all students" can learn scoring the highest mark. "Fairness" scored the lowest with "Dependability" and "Commitment" to inquiry ranking very close, from 1-4 on the categories of Resourcefulness, Dependability, and Commitment to Inquiry.

Professor Evaluation: Overall, these results indicate that candidates are generally open to diversity and meeting students' needs, personal growth and self-reflection, and collaboration with all stakeholders in the program and school communities. These results are reflective of interview results when candidates were initially screened in the spring prior to admission into the program. The varied ratings appeared to indicate the candidates' individual differences and awareness of those differences and should have provided focus for growth in these areas for the program year. Opportunities should have been made for the students to embrace those differences and learn and grow with each other. Additional focus should be given to students' ability to analyze data.

Dispositions Rating Scale Candidate Performance Report

First Rating- Cohort XIV (2011-12)
Use of Evaluation Results

1 & 2. An exit interview is conducted in EDL 640 Organizational and School Issues I/EDL 740 School and Community Issues I, which is in the last 12 hours of coursework. The Dispositions Rating Scale is administered as a self-assessment for candidates and by the professor. Results will be compared with the first administration and analyzed by both the professor and the candidate to note any improvements or deficiencies.

Utilize disposition data to individualize student learning programs.

Faculty should consider reporting on both sets of data so as to demonstrate changes over the program year.

GE 08: Perspectives
GE 10: Values

MED-EAS 08: LO Clinical Correlations
Start: 7/1/2012
End: 6/30/2013
Learning Outcome
Clinical Correlations -

Demonstrate the ability to integrate content and professional knowledge and skills with real life experiences and situations

Organize and prepare documentation to demonstrate the ability to integrate content and professional knowledge and skills with real life experiences. Also included are aligning practice to Interstate School Leader Licensure Consortium/Education Leadership Constituents Council standards, creating a reflection and alternate outcomes journal, and producing and presenting projects that implement a new operation for school effectiveness.

Data Collection (Evidence)
1 & 2. Clinical Correlations are analyses of situations and experiences from each of the three internships. Each correlation must relate to ISLLC/ Educational Leadership Constituent Council Standards, a current educational issue, and one of the program anchors. Each must include a description of an actual situation, the outcomes or consequences of actions taken, an analysis of possible alternative actions, the policy or legal implications, and a reflection on what was learned from the situation.

3. A 4-point rubric is used: 1 – Rudimentary, 2 – Developing, 3 – Proficient, 4 – Exemplary

Results of Evaluation
Data shows students stumbled in their first internship as is true with past Cohorts.

Proficient or above range was 73.28% on Clinical Correlations I, 85% on Clinical Correlations II, and 89.38% on Clinical Correlations III.

The increase in the overall mean from Correlations 1 to Correlations 3 is attributed to an increase in the expectations for quality in the correlations and a more specificity in the rubric for scoring in addition to meaningful instruction from the teacher and a clearer understanding of expectations on the part of the students.

During the first internship, faculty reviewed clinical correlations each week, feedback was provided and candidates revised the correlations prior to final submission based on the feedback received. This process allowed candidates to develop skills and understand expectations. During the second internship, the debriefing sessions on Wednesdays included discussions and analyses of situations and actions, but the Correlations were submitted and evaluated only once as a final product. The scores decreased slightly due to less feedback in Internship II, but increased and slightly surpassed the overall mean in Internship III. This indicated an overall improvement in candidates’ abilities to recognize issues and situations related to educational issues and the legal or policy implications, and then interpret and evaluate the actions taken as well as recommend actions that may have been more appropriate. Candidates showed growth in being able to apply “Alternate Actions, Implications, and Reflections” to each situation as they progressed from the first internship to the last internship.

Trends Noted
Internship scores increase over the three internships as students ability to correlate active learning with theory aligned to standards improves.

In past years, it has been noted that candidates made substantial progress in Mechanics. Educational Issues and Dispositions and Alternate Actions, Implications and Reflections ended below expectations of 3.5.
Use of Evaluation Results

1 & 2. Faculty should continue to emphasize Clinical Correlations as a strong component of the program to encourage reflection and help candidates link content and theory to best practice by analyzing actions with regard to policy or legal implications and to promote. Using various scenarios provided by students each week as class activities for analysis and discussion during the first two internships should promote growth over the course of the program year.

This is emphasized with next Cohort.

MED-ELE 01: LO Demonstrate understanding of knowledge and skills

<table>
<thead>
<tr>
<th>Start: 7/1/2012</th>
<th>End: 6/30/2013</th>
</tr>
</thead>
</table>

Learning Outcome

Demonstrate understanding of knowledge and skills associated with the content of the M.Ed. degree program in Elementary Education

Data Collection (Evidence)

1. Content and pedagogical content knowledge will be assessed using a comprehensive examination.
2. The comprehensive examination will be administered each semester and each summer session to candidates in the final course of the M.Ed.
3. A rubric will be used to evaluate the exams. Distribution of scores will be assessed to examine strengths and weaknesses in the program.

The comprehensive examination is linked to both the National Board for Professional Teaching Standards (NBPTS) for the middle childhood/generalist (Standard II, Knowledge of Content and Curriculum), and the early childhood generalist (Standard V, Knowledge of Integrated Curriculum). These standards relate directly to knowledge/skills that elementary teachers need in order to understand what needs to be taught.

Results of Evaluation

In 2012, a total of 47 online M.Ed. candidates took the comprehensive exam. Twelve candidates failed the exam, thus yielding a pass rate of 75%. All candidates responded to items for CEL 610, CEL 618, & CRD 624, which is a requirement for Comps. Of the responses for CEL 610, 91% passed the item and 9% failed: 19 received target ratings, 24 received acceptable ratings, and 4 received an unacceptable rating. Of the responses for CEL 618, 85% passed the prompt and 15% failed: 19 received target ratings, 21 received acceptable ratings, and 7 received an unacceptable rating. Of the responses for CRD 624, 87% passed and 13% failed: 20 received target ratings, 21 received acceptable ratings, and 6 received an unacceptable rating. Candidates had choices between the following courses: CEL 611, CEL 620, CEL 621, & CEL 630. Thirty-seven candidates responded to CEL 611: 89% passed and 11% failed with 15 receiving target ratings, 18 receiving acceptable ratings, and 4 receiving a rating of unacceptable. Thirty-eight candidates responded to CEL 620: 87% passed and 13% failed with 15 receiving target ratings, 18 receiving acceptable ratings, and 5 receiving unacceptable ratings. Thirty-seven candidates responded to CEL 621: 88% passed and 14% failed with 15 receiving a target rating, 17 receiving acceptable ratings, and 5 receiving unacceptable ratings. Twenty-six candidates responded to CEL 630: 92% passed and 8% failed with 12 receiving a target rating, 12 receiving acceptable ratings, and 2 receiving unacceptable ratings.

A total of 9 Tishomingo M.Ed. candidates took the comprehensive exam. All nine candidates (100%) passed the exam. All candidates responded to items for CEL 610, CEL 618, & CRD 624, which is a requirement for Comps. Of the responses for CEL 610, 100% passed the item: two (22%) received target ratings and seven (78%) received acceptable ratings. Of the responses for CEL 618, 100% passed the prompt: three (33%) received target ratings and six (67%) received acceptable ratings. Of the responses for CRD 624, 100% passed the item: five (56%) received target ratings and four (44%) received acceptable ratings. Candidates had choices between the following courses: CEL 611, CEL 620, CEL 621, & CEL 630. Nine candidates responded to CEL 611: 100% passed with three (33%) receiving target ratings and four receiving acceptable ratings. Eight candidates responded to CEL 620: 100% passed with two (25%) receiving target ratings and six (75%) receiving acceptable ratings. Eight candidates responded to CEL 621: 100% passed with three (38%) receiving a target rating and five (62%) receiving acceptable ratings. Two candidates responded to CEL 630: 100% passed with one (50%) receiving a target rating and one (50%) receiving an acceptable rating.

Overall, a majority of the online candidates demonstrated comprehensive knowledge and understanding of the important concepts and topics encountered throughout the M.Ed. program of study. A majority (35 out of 47 or 74%) mastered the exam with at least 85% passing for all course areas. The greatest number of failed responses were noted for CEL 618 (15%) and CEL 621 (14%). The least number of failed responses were noted for CEL 630 (6%) and CEL 620 (4%). As a required item, CRD 624: Literacy instruction yielded the greatest number of target ratings (20 or 43%). Of the choice items, CEL 621 yielded the greatest number of target ratings (21 or 57%). All of the Tishomingo candidates demonstrated comprehensive knowledge and understanding of the important concepts and topics encountered throughout the M.Ed. program of study. All mastered the exam with 100% passing for all course areas. As a required item, CRD 624: Literacy Instruction yielded the greatest number of target ratings (5 or 56%). CEL 610 yielded the least number of target ratings (2 or 22%). Of the choice items, CEL 621 yielded the greatest number of target ratings (3 or 38%).

Trends Noted

At the onset of offering the Master’s program online in 2009, the online candidates’ pass rate was 50% compared to the campus candidates’ pass rate of 85%. Study guides were disseminated for subsequent comps administrations. Discussions and readings were added to CEL 610, CEL 620, and CRD 624 to engage the students in more in-depth knowledge of the comps topics. The pass rate for the online program rose to 87% in 2010 and maintained in 2011. However, the pass rate decreased to 74% for 2012. The Tishomingo cohort has maintained a strong pass rate for the comprehensive exam. The cohort candidates receive the same study guide as the online candidates; however, the Tishomingo cohort participates in 2 face-to-face classes per course.

Use of Evaluation Results

1. Graduate faculty agreed that a strong overall pass percentage for the Comps is 80%. Course discussions and readings that are covered on the comprehensive exam will be highlighted with more faculty-student engagement.

2. A renewed effort will be made to ensure faculty engage students in content covered on the comps with faculty-student interactions through discussions and other media.

3. Course discussions and readings for CEL 610 that are covered on the comprehensive exam will be highlighted with more faculty-student engagement during class meetings and online discussions. For the Tishomingo Cohort, discussions and readings that emphasize comps topics were added to all of the courses that are tested on the comprehensive exam. Cohort class meetings were orchestrated to highlight comps content as well as elaborate on the online discussion assignments that covered comps material.

<table>
<thead>
<tr>
<th>Start: 7/1/2012</th>
<th>End: 6/30/2013</th>
</tr>
</thead>
</table>

Learning Outcome

Demonstrate skill in verbal ability adequate for success in a graduate program.
Data Collection (Evidence)  
A satisfactory writing proficiency score must be submitted during the first 12 hours of coursework in order to receive full admission and complete the program. Candidates may choose from one of the following assessments:

- CAAP – minimum score of 3
- GRE Writing – minimum score of 4.0
- MAT – minimum score of 30
- Praxis I Writing (PPST or CBT) – minimum score of 174
- NTE (Communication Skills) – minimum score of 653

Results of Evaluation  
A total of 75 online candidates were admitted to the M.Ed. program in 2012. The verbal ability test scores that were verified indicated that 9 candidates had NTE scores that ranged from 653-675. 65 candidates had Praxis writing scores that ranged from 174-187, and 2 candidates had CAAP scores that ranged from 3-4.

All fully-admitted candidates demonstrated acceptable verbal ability.

Use of Evaluation Results  
1. Faculty agreed that 174 on the Praxis I Writing examination as opposed to requiring the score of 172 that is acceptable for licensure with the State Department of Education is more suitable for graduate students who must demonstrate a higher level of verbal proficiency.

MAP-ELE 04: LO Demonstrate the ability to teach effectively in a field experience/clinical setting  

Start: 7/1/2012  
End: 6/30/2013  

Learning Outcome  
Demonstrate the ability to plan and support planning at both the lower and upper elementary levels using appropriate professional expertise.

Data Collection (Evidence)  
1 & 2. In CEL 630 Practicum candidates will be required to plan and implement a teaching unit.

3. Sections of the Graduate Teacher Work Sample (TWS) will be used as a means to demonstrate candidate ability to plan and support planning. Sections to be used are Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction, Instructional Decision Making, and Design for Instruction in Elementary Education. The first nine indicators of the Teacher Intern Assessment Instrument will also be used. A distribution of scores will be used to analyze data.

Results of Evaluation  
All of the online candidates in CEL 630 - Practicum in Elementary Education demonstrated the ability to use contextual information (100% met indicator) and technology (100% met indicator) to plan effective lessons. All of the candidates were able to accurately represent content and use a variety of instructional activities. All of the candidates demonstrated the ability to plan appropriate teaching procedures and assessment procedures. All of the candidates were able to modify instructions based on the student data and align lessons with the Mississippi curricular standards and the Common Core Standards.

Most of the Tishomingo candidates in CEL 630 - Practicum in Elementary Education demonstrated the ability to use knowledge of students' backgrounds, interests, experiences, and prior knowledge (e.g., pretests, learning styles inventories, interest inventories, multiple intelligences surveys, and KWLs) to make instruction relevant and meaningful (2.33/3), select developmentally appropriate objectives for lessons based on state frameworks and best practices (2.22/3), select a variety of appropriate materials and technology for lessons (2.00/3), and use assessment information (e.g., pretests, quizzes, unit tests, remediation, and enrichment activities) to plan differentiated learning experiences that accommodate differences in developmental and/or educational needs (2.00/3). Weak areas noted in the candidates' ability to integrate knowledge from several subject areas in lessons (1.67), plan appropriate teaching procedures (1.78), prepare appropriate assessment procedures and materials to evaluate learner progress (1.78), and use a variety of strategies to introduce and close lessons (1.78/3).

Overall, the Tishomingo candidates demonstrated the ability to use contextual factors related to the students to plan meaningful and relevant lessons. They were able to select developmentally appropriate learning objectives and appropriate materials and technology in their planning. They also demonstrated the ability to differentiate instruction to meet the needs of diverse learners. The lowest group averages for the Tishomingo candidates were in their ability to integrate knowledge from several subject areas in lessons (55.56/100), plan appropriate teaching procedures (59.26/100), and plan appropriate assessment procedures and materials to evaluate learner progress (59.26/100).

Trends Noted  
A previous concern with the candidates' ability to explicitly align all lessons with learning goals, integrate physical education and health into the unit lessons, effectively use technology, and foster higher thinking skills was addressed with more explicit and specific online discussions regarding planning effective lessons, targeted course readings and research assignments that focused on specific aspects of the Teacher Intern Assessment Instrument (TIAI) indicators, and instructor feedback while planning the unit. Weak areas have seen improvement.

For the Tishomingo candidates, in 2011, the candidates demonstrated the ability to plan effective lessons. Trends had not been noted at that time, but the lowest ratings were in preparing appropriate assessments and using assessment information. Preparing appropriate assessments continues to be a weakness for the Tishomingo cohorts.

Use of Evaluation Results  
1. We will maintain an emphasis on technology use, differentiating instruction, and fostering higher order thinking skills. We will continue to monitor candidate performance of indicators 1-9 of the Teacher Intern Assessment Instrument (TIAI). We will also monitor adjunct perception of acceptable candidate performance.

2. For online candidates, weak areas have seen improvement.

For Tishomingo candidates, the following changes will be made to foster candidates' ability to demonstrate efficiency in planning: modify course discussions, readings, and research assignments to ensure candidates learn and simulate best practices for planning effective lessons. Also, include discussions and activities that emphasize integrating different content areas into lessons during the face-to-face class meetings, provide videos or simulations that will help them plan procedures that account for all aspects of the teaching/learning process.

MAP-ELE 04: LO Demonstrate the ability to teach effectively in a field experience/clinical setting  

Start: 7/1/2012  
End: 6/30/2013  

Learning Outcome  
Demonstrate the ability to teach effectively in a field experience/clinical setting.

Data Collection (Evidence)  
1 & 2. In CEL 630 Practicum, candidates will be evaluated while teaching a lesson.

3. A rubric and a modified Graduate Teacher Work Sample (TWS) incorporating parts of the Teacher Intern Assessment Instrument (indicators 10-34) will be used to evaluate the candidates' teaching.

Results of Evaluation  
In 2012, all online candidates in CEL 630-Practicum in Elementary Education received either outstanding or acceptable ratings for all indicators of the TIAI for teaching. All candidates demonstrated knowledge of the subject(s) taught (100%), the use of a variety of appropriate teaching strategies (100%), and the use of higher-order questions to engage students in analytic, creative, and critical thinking (100%). Additionally, they all demonstrated the ability to provide learning experiences that accommodated differences in developmental and individual needs of diverse learners (i.e., learning styles, multiple intelligences and enrichment/remedial needs).
Most of the Tishomingo candidates in CEL 630 Practicum in Elementary Education communicated high expectations for learning to all students (2.67/3), demonstrated knowledge of the subject(s) taught (2.44/3), monitored and adjusted the classroom environment to enhance social relationships, motivation, and learning (2.44), demonstrated fairness and supportiveness in order to achieve a positive, interactive learning environment (2.67/3), and used instructional time effectively (2.67/3). Weaknesses were noted in their ability to use higher-order questions to engage students in analytic, creative, and critical thinking (1.89/3), provide learning experiences that accommodate differences in developmental and individual needs of diverse learners (1.89/3), and develop and use a variety of formal assessments (ex. – pretests, quizzes, unit tests, rubrics, remediation, and enrichment activities) to differentiate learning experiences that accommodate differences in developmental and/or educational needs (1.87/3).

Trends Noted
Online candidates have consistently implemented sound instruction and have demonstrated content and pedagogical content knowledge. The graduate faculty will continue to emphasize effective planning and teaching techniques in the practicum course and all other courses that include planning and teaching. Communicating course expectations with adjunct faculty and modifying discussions, course readings, and other course activities to increase candidate engagement with sound teaching practices seems to have also benefited this practicum course. For Tishomingo candidates, in 2011, the lowest ratings were noted for communicating assessment criteria, developing and using a variety of informal assessments, and developing and using a variety of formal assessments. At that time, graduate faculty modified instruction to emphasize effective assessment in the practicum course and all other courses that include planning and teaching. Developing and implementing appropriate assessments continues to be a weakness.

Use of Evaluation Results
1. The graduate faculty will continue to monitor candidate performance of indicators 10-34 of the Teacher Intern Assessment Instrument (TIAI). We will also monitor adjunct perception of acceptable candidate performance.

2. Course discussions, readings, and research assignments will be modified to ensure candidates learn and simulate best practices for teaching effective lessons. Face-to-face class meetings will include discussions and activities that emphasize implementing instruction for diverse learners, facilitating higher-order thinking skills among K-6 students, and using a variety of assessments to monitor student progress.

MED-ELE 05: LO Demonstrate the ability to positively impact student learning in a field experience/clinical setting

<table>
<thead>
<tr>
<th>Start: 7/1/2012</th>
<th>End: 6/30/2013</th>
</tr>
</thead>
</table>

Learning Outcome
Demonstrate the ability to positively impact student learning in a field experience/clinical setting.

Data Collection (Evidence)
1 & 2. CEL 630 Practicum, pre- and post-assessment data will be used to evaluate the impact of the lesson developed for the course on student learning and the support of an environment that supports learning.

3. The Graduate Teacher Work Sample will be used in CEL 630 Practicum to collect the data to show that candidates have an impact on student learning and support an environment that supports learning.

Results of Evaluation
In 2012, all online candidates in CEL 630-PRACTICUM in Elementary Education demonstrated the ability to meaningfully interpret student data and draw appropriate conclusions. All (100%) presented the data with clarity and accuracy, aligned the assessments with learning goals, interpreted the data appropriately, and demonstrated evidence of the impact on student learning in terms of number of students who achieved and made progress toward each learning goal.

Most Tishomingo candidates in CEL 630 Practicum in Elementary Education demonstrated the ability to meaningfully interpret student data and draw appropriate conclusions. Most presented the data with clarity and accuracy (2.00/3), aligned the assessments with learning goals (2.22/3), and demonstrated evidence of the impact on student learning in terms of number of students who achieved and made progress toward each learning goal (2.13/3). Weaknesses were noted in the candidates’ ability to meaningfully interpret their data and draw appropriate conclusions (1.89/3).

Trends Noted
In 2010, improvements were noted in all of the candidates’ ability to meaningfully interpret student data and draw appropriate conclusions and to demonstrate evidence of the impact on student learning in terms of number of students who achieved and made progress toward each. Faculty discussed the rigor of this assessment in regards to the task that requires data analysis for subgroups. It was agreed that the M.Ed. candidates needed to complete this task with practicality and usefulness of analysis results. Beginning Spring 2011, task 6 of the Teacher Work Sample (TWS) was modified to require candidates to analyze prescribed subgroups which reflect current classroom populations, assessments, and school district policies. A review of the 2011 data revealed the candidates were able to follow prescribed data analysis requirements to successfully interpret their impact on student learning. Candidates have maintained an ability to demonstrate impact on student learning.

Use of Evaluation Results
1. Content and media will be added to the online courses to engage online candidates in exercises that examine and interpret data. Face-to-face class meetings for the Tishomingo group will include visuals and exercises that examine and interpret data.

2. The M.Ed. Teacher Work Sample (TWS) was modified to clarify tasks and prompts and to offer candidates more direct explanations of expectations. Thus, Fall 2012, the revised Graduate Teacher Work Sample was implemented. Trends will be examined, especially the prompts that require candidates to analyze learner outcomes.

MED-ELE 06: LO Demonstrate appropriate dispositions

<table>
<thead>
<tr>
<th>Start: 7/1/2012</th>
<th>End: 6/30/2013</th>
</tr>
</thead>
</table>

Learning Outcome
Demonstrate appropriate dispositions for candidates who are working toward the M.Ed. degree in Elementary Education.

Data Collection (Evidence)
1. Candidates complete a Dispositions Portfolio prior to taking the comprehensive examination. The portfolio includes (1) completing the Graduate Version of the Dispositions Rating Scale as a self-assessment, and (2) the submission of artifacts to provide a rationale for the self-ratings given. The program coordinator uses a 4-point scale (1 low – 4 high) to assess
the candidate's skill in providing a rationale for the self-ratings.

2. Data are collected in TaskStream.

3. TaskStream reports provide means and score distributions.

Results of Evaluation
In 2012, according to candidate self-ratings, 100% met or exceeded the criteria for fairness, belief that all students can learn, professionalism, resourcefulness, dependability, and commitment to inquiry. Faculty ratings revealed that candidates demonstrated their belief that all students can learn (3.54/4). They demonstrated their commitment to inquiry (3.15/4) and their fairness to all students (3.46/4). The lowest ratings were noted for dependability (2.71/4) and resourcefulness (2.88/4).

Fall 2012, Tishomingo cohort candidates who applied for graduation submitted electronic Disposition Portfolios. All candidates met or exceeded expectations for professional dispositions. The following means were noted: Fairness- 3.13/4; belief that all students can learn- 3.13/4; professionalism- 3.09/4; resourcefulness- 2.88/4; dependability- 2.88/4; and commitment to inquiry- 2.88/4.

Overall, the candidates demonstrated positive dispositions that reflect professionalism.

According to all candidate self-ratings, 100% met or exceeded the criteria for fairness, belief that all students can learn, professionalism, resourcefulness, dependability, and commitment to inquiry.

Trends Noted
Fall 2010 was the first iteration of the Dispositions Portfolio. Data was analyzed for trends. According to faculty ratings, the following means were noted: Fairness- 2.83/4; belief that all students can learn-3.33/4; professionalism- 3.33/4; resourcefulness- 3.17/4; dependability- 3.33/4; and commitment to inquiry- 3.17/4. Particular attention was paid to the Fairness category since this was a weakness before the electronic Disposition Portfolio was begun. In 2011, a weakness continued to be noted in the candidates' ability to demonstrate fairness. The faculty developed a tips sheet for helping candidates identify and reflect upon their demonstrations of fairness. The tips were added to the Dispositions Portfolio directions document. The 2012 data revealed that candidates' overall ability to demonstrate fairness improved.

Use of Evaluation Results
1. Courses that focus on instructional practices will highlight attributes of fairness to ensure our candidates understand the importance of ensuring that all students get the same opportunity to learn.

2. We will work to improve candidate ratings with resourcefulness and dependability by providing examples of evidence that could be included in the portfolio and directing newly admitted candidates to the Disposition Portfolio information on the program webpage so they can start gathering evidence at the outset.

MED-ELE 07: LO Demonstrate an understanding of diversity and the ability to teach diverse populations effectively.

Start: 7/1/2012
End: 6/30/2013

Learning Outcome
Demonstrate an understanding of diversity and the ability to teach diverse populations effectively.

Data Collection (Evidence)

1. CRD 624, Literacy Instruction. In this course, data will be collected from an essay question in the final examination.

Information pertaining to diversity is directly related to Standard II (Equity, Fairness, and Diversity) of the early childhood/generalist area of the National Board of Professional Teaching Standards as well as Standard IV (Respect for Diversity) of the middle childhood/generalist area.

Results of Evaluation
During CRD 624 Literacy Instruction, candidates completed an essay item that evaluated their ability to accept and to meet the diverse needs of students. Forty-seven candidates completed the essay item. Sixty received acceptable ratings and 16 received outstanding ratings. Two candidates received marginal or unacceptable ratings. The Tishomingo candidates completed the same essay item. Six received acceptable ratings and 4 received outstanding ratings. None received marginal or unacceptable ratings.

A majority of the all candidates (98%) were able to demonstrate their ability to accept and to meet the needs of diverse learners during literacy instruction.

Trends Noted
Candidates have consistently demonstrated their ability to accept and meet the needs of diverse learners during literacy instruction.

Use of Evaluation Results
1 & 2. No changes will be made.

MED-SE 01: LO Demonstrate mastery of the content

Start: 7/1/2012
End: 6/30/2013

Learning Outcome
Demonstrate mastery of the content of the M.Ed. degree program in special education (including, but not limited to, history, philosophy, theories, legal and ethical practices, service delivery, and curriculum and instruction) by successfully completing an essay-type comprehensive examination. The comprehensive examination will be rated on a two dimensional rubric which measures content mastery and writing competency. Candidates must score at least 280 out of a possible 400 points (70%). Program goal is for 70% of candidates to pass the exam in each semester. All candidates must pass the exam to exit the program.

Data Collection (Evidence)
Candidates will take an essay-type comprehensive examination in the last semester of their program. This may be the semester in which the candidate is taking remaining coursework, or it may be the semester after course completion. Candidates are required to attend at least one comprehensive examination study session before taking the comprehensive examination. These sessions orient the candidates to the format of the examination; provide a study guide with prompts and a copy of the rubric; and suggestions on time management and editing during the test session.

The examination consists of four sets of questions covering: 1) Law and Practices, 2) Development and Characteristics of Learners 3) Individual Learning Differences, and 4) Professional and Ethical Practice. Each set includes two questions and a single set of prompts derived from the Council for Exceptional Children standard(s) covered by that set.
Candidates are given the prompts and related Council for Exceptional Children standards in practice comprehensive exams administered throughout the program and in comps study and orientation sessions. On the examination, the candidates are given the questions and the prompts. Prompts are provided to elicit parallel content regardless of the specific question. The exam is given in two three-hour sessions; each session covers two question sets. Candidates respond to one question from each question set.

Comprehensive exams will be graded using a 4-point rubric, which rates both content and writing. Candidates are rated on a) mechanics, b) content breadth, c) content depth, d) standards based content, e) organization, and f) clarity. Three faculty members read and score each candidate’s work. Candidates must score 70% or higher from at least two faculty members. Faculty members meet to discuss the results for each candidate to make the final determination. All decisions are made blind; candidate names are not revealed until the entire group has been processed.

Comprehensive examinations are administered in the candidates’ last semester of enrollment in the program.

Ge 03: Quantitative Skills

Med-se 02: LO Demonstrate skills in planning and implementing instruction

Start: 7/1/2012
End: 6/30/2013

Learning Outcome
Plans and implements instruction for students with exceptional learning needs (ELN) by using contextual factors to create learning goals and an assessment plan, which are incorporated into a 5-10 day teaching unit. The contextual factors, learning goals, assessment plan and instructional design for the teaching unit will be assessed with the rubrics from the Special Education Teacher Work Sample: Pre-planning Section (SETWSI). Candidates must score a 2 or higher on each indicator of the rubric. Program goal is for 90% of candidates to meet expectations on each element of the rubric.

Data Collection (Evidence)
Assessment III: Special Education Teacher Work Sample: Pre-planning Section (SETWSI)
Description of the assessment: Candidates write and implement a 5-10 day instructional unit during the clinical practice course (CSP 547 Internship in Special Education or CSP 647 Action Research in Special Education). Candidates who have an undergraduate degree in education that included internship have already completed a 5-10 day unit and will complete a 5-day unit in their field research semester (CSP 647 Action Research in Special Education). Candidates who do not have an undergraduate degree in education will complete a 10-day unit in their internship (CSP 547 Internship in Special Education).

To demonstrate the reflective nature of the planning process, the unit is embedded in a modified version of the Teacher Work Sample, which is used by several programs at Delta State University. The Special Education Teacher Work Sample is submitted in electronic form. Candidates complete a sample of the Unit Planner on a formative level in CSP 643 Programming for Adolescents with Mild/Moderate Exceptional Learning Needs and CSP 686 Education of Individuals with Mild/Moderate Exceptional Learning Needs.

In preparing the 5-10 day unit, the candidate responds to prompts in four sections of the Electronic Folio: a) Contextual Factors, b) Learning Goals, c) Assessment Plan, and d) Design for Instruction. Each candidate submits individual sections of the folio for review by the course instructor. The unit is approved by the instructor before it is implemented. Final submission of the entire folio is required after the unit has been taught. The Folio is rated on a 3-point rubric. Candidates must score a minimum of a 2 on each of the four sections of the rubric.

In the Spring Semester 2012, 6 candidates completed a Special Education Teacher Work Sample. The mean score for contextual factors was 2.37, for learning goals 2.67, for assessment plan 2.47, and for design for instruction 2.56. Subscores were reported in 3 levels: expectations not met, expectations met and expectations exceeded. Expectations were met or exceeded on all subscores. Areas of strength are defined as those with 70% of candidates exceeding expectations. Areas of weakness are those with more than 50% meeting, but not exceeding expectations. Areas of strength in Spring 2012 were (percentages are of candidates exceeding expectations): clarity of learning goals (100%), alignment of assessment plan (83%), alignment with learning goals in design for instruction (83%), lesson and unit structure in design for instruction, use of a variety of instruction, activities, assignments and resources (83%), and use of technology (83%). Although candidates met or exceeded expectations in all subscores, relative weaknesses included (percentages of candidates meeting but not exceeding expectations): in contextual factors, community and school factors (67%), varied approaches to learning (67%), skills and prior learning (67%) and instructional implications (67%); in assessment plan, adaptations (67%) and record-keeping (100%); and in design for instruction, accurate representation of content (83%).

In the Fall Semester 2012, 7 candidates completed a Special Education Teacher Work Sample. The mean score for contextual factors was 2.46, for learning goals 2.64, for assessment plan 2.52, and for design for instruction 2.43. Subscores were reported in 3 levels: expectations not met, expectations met and expectations exceeded. Expectations were met or exceeded on all subscores. Areas of strength are defined as those with 70% of candidates exceeding expectations. Areas of weakness are those with more than 50% meeting, but not exceeding expectations. Areas of strength in Fall 2012 were (percentages are of candidates exceeding expectations): varied approaches to learning (71%), clarity of learning goals (100%), alignment of assessment plan (100%), alignment with learning goals in design for instruction (100%), and unit and lesson structure (86%). Although candidates met or exceeded expectations in all subscores, relative weaknesses included (percentages of candidates meeting but not exceeding expectations): in contextual factors, individual student characteristics (71%), instructional implications (71%); in assessment plan, adaptations (71%) and record-keeping (100%); and in design for instruction,
Use of Evaluation Results
Although the performance on this assessment is acceptable, the faculty members have recognized that the capstone class is overloaded with major assessments. The following changes have been implemented to reduce some of the overload:
1. The comprehensive examination has been moved to the semester after the internship.
2. The Teacher Work Sample (TWS) is presented in an earlier methods class for formative assessment.
3. Candidates without an undergraduate in education are now required to complete two semesters of internship. The TWS is in the second semester, after the candidate has successfully completed a semester teaching daily in an inclusion classroom. This decision was directly related to the relatively weak performance in contextual factors and some elements of instructional design.

MED-SE 03: LO Demonstrate skills in the measurement of student achievement and adjustment of instruction for maximum impact on student achievement.

Start: 7/1/2012
End: 6/30/2013

Learning Outcome
Demonstrates maximum impact on student achievement by analyzing instructional decisions and their effect on student learning; and by reflecting on their own performance.

This will be measured by the rubrics in the Special Education Teacher Work Sample: Post Planning (SETWS:II). Candidates must score a 2 or higher on each indicator of the rubric.

Program goal is for 90% of candidates to meet expectations on each element of the rubric.

Data Collection (Evidence)
Assessment V: Special Education Teacher Work Sample: Post Planning (SETWS:II)

Description of the assessment: Candidates write and implement a 5-10 day instructional unit during the clinical practice course (CSP 547 Internship in Special Education or CSP 647 Action Research in Special Education). Candidates who have an undergraduate degree that included internship have already completed a 5-10 day unit and will complete a 5-day unit in their field research semester (CSP 647 Action Research in Special Education). Candidates who do not have an undergraduate degree in education will complete a 10-day unit in their internship (CSP 547 Internship in Special Education).

To demonstrate the reflective nature of the planning process, the unit is embedded in a modified version of the Teacher Work Sample, which is used by several programs at Delta State University. The Special Education Teacher Work Sample is submitted in electronic form. Candidates complete a sample of the Unit Planner on a formative level in CSP 643 Programming for Adolescents with Mild/Moderate Exceptional Learning Needs and CSP 686 Education of Individuals with Mild/Moderate Exceptional Learning Needs.

After teaching the 5-10 day unit, the candidate responds to prompts in three sections of the electronic folio: a) instructional decision making; b) analysis of student learning; and c) reflection and self-evaluation. Each candidate submits individual sections of the folio for review by the course instructor. The unit is approved by the instructor before it is implemented. Final submission of the entire folio is required after the unit has been taught. The folio is rated on a 3-point rubric. Candidates must score a minimum of a 2 on each of the four sections of the rubric.

In the Spring Semester 2012, 6 candidates completed a Special Education Teacher Work Sample Part II. The mean score for instructional decision making was 2.27, for analysis of student learning 2.21, and for reflection and self-evaluation 2.20. Subscores were reported in 3 levels: expectations not met, expectations met and expectations exceeded. Expectations were met or exceeded on all subscores. Areas of strength are defined as those with 70% of candidates exceeding expectations. Areas of weakness are those with more than 50% meeting, but not exceeding expectations. There were no areas of relative strength in Spring Semester 2012. Although candidates met or exceeded expectations in all subscores, relative weaknesses included percentages of candidates meeting but not exceeding expectations. Modifications based on analysis of student learning (83%), congruence between modifications and learning goals (83%), alignment with learning goals (83%), interpretation of data (100%). Evidence of impact on student learning (83%), implications for future teaching (87%) and implications for professional development (83%).

In the Fall Semester 2012, 7 candidates completed a Special Education Teacher Work Sample Part II. The mean score for instructional decision making was 2.52, for analysis of student learning 2.43, and for reflection and self-evaluation 2.34. Subscores were reported in 3 levels: expectations not met, expectations met and expectations exceeded. Expectations were met or exceeded on all subscores. Areas of strength are defined as those with 70% of candidates exceeding expectations. Areas of weakness are those with more than 50% meeting, but not exceeding expectations. An area of strength in Fall 2012 was (percentages are of candidates exceeding expectations): Sound professional practice (96%). Although candidates met or exceeded expectations in all subscores, relative weaknesses included (percentages of candidates meeting but not exceeding expectations): congruence between modifications and learning goals (60%), interpretation of data (71%), interpretation of student learning (71%), alignment among goals, instruction and assessment (71%). Implications for future teaching (71%) and implications for professional development (71%).

Use of Evaluation Results
Although the performance on this assessment is acceptable, the faculty members have recognized that the capstone class is overloaded with major assessments. The following changes have been implemented to reduce some of the overload:

1. The comprehensive examination has been moved to the semester after the internship.
2. The Teacher Work Sample (TWS) is presented in an earlier methods class for formative assessment.
3. Candidates without an undergraduate in education are now required to complete two semesters of internship. The TWS is in the second semester, after the candidate has successfully completed a semester teaching daily in an inclusive classroom. This decision was directly related to the relatively weak performance in contextual factors and some elements of instructional design.

Additional changes specific to data collection and analysis

1. CSP 545 Assessment in Special Education is undergoing significant revisions to better train teachers in data-based decision making.
2. CSP 686 is being transformed into a course called Teaching for Inclusion. The emphasis in this class will be data-based instruction in inclusive classrooms, including Response to Intervention systems, Functional Behavioral Assessment and differentiated instruction.

**MED-SE 04: LO Demonstrate the ability to complete a successful internship/practicum.**

**Start:** 7/1/2012
**End:** 6/30/2013

**Learning Outcome**
Demonstrate teaching proficiency in lesson planning, instructional delivery, managing the classroom environment, and assessment and evaluation. Skills will be measured through observation of the candidate teacher using Special Education Teacher Intern Assessment Instrument (SETIA).

Candidates must score a 2 or higher on each indicator of the rubric. Program goal is for 90% of candidates to meet expectations on each element of the rubric.

**Data Collection (Evidence)**

**Assessment IV: Special Education Teacher Intern Assessment Instrument**

**Description of the assessment:** During the capstone course (CSP 547 Internship in Special Education or CSP 647 Action Research in Special Education), each candidate is observed three times, at least one of which is during the implementation of the teaching unit. Observers use the Special Education Teacher Intern Assessment Instrument (SETIA), a statewide assessment used to evaluate pre-service and in-service teachers in Mississippi. The Special Education Teacher Intern Assessment Instrument is used to assess planning and implementation of a 5-10 day teaching unit. The instrument has 34 indicators, each of which is scored on a 0-3 point rubric. Candidates must score a minimum of 2 on each indicator.

**Alignment to standards:** Each of the 34 indicators has been aligned with the Council for Exceptional Children competencies. Because the emphasis in the Special Education Teacher Intern Assessment Instrument is on planning, implementation, and management of instruction, it corresponds closely with standards 4, 5 and 7. However, individual sections of the instrument target additional standards. Alignment to Council for Exceptional Children competencies are embedded in the rubric.

Fall 2012A: 1, 6 14% 86%
Fall 2012B: 0, 0 100%
In Spring Semester 2012, six candidates successfully completed the Special Education Teacher Intern Assessment Instrument. Candidates were observed twice and the results of the two observations were compared. Indicators are in four categories: lesson planning (indicators 1-9), instructional delivery (indicators 10-23), classroom management (indicators 24-29), and assessment (indicators 30-34). The first observation is considered to be formative, so category skills are from the second, summative, observation. The strongest category was classroom management, with a mean of 2.42. The weakest area was assessment with a mean of 2.0. Lesson planning had a mean of 2.26, and instructional delivery 2.35.

Candidates were rated on 34 indicators on a 3-point Likert scale: 1 - Expectations not met, 2 - Expectations Met and 3 - Expectations Exceeded. Strength areas were those with 60% of candidates exceeding expectations, weakness areas were those with less than 30% exceeding expectations.

Indicators 1-9 represent candidate performance in lesson planning. In the first observation weakness areas were: selects developmentally appropriate objectives for lessons based on state frameworks, and best practices in general and special education; Plans appropriate teaching procedures which are age and ability appropriate; Uses assessment information (e.g., pretests, quizzes, unit tests, remediation, and enrichment activities) to plan differentiated learning experiences that accommodate differences in developmental and/or educational needs.

Indicators 10-23 represent instructional delivery. In the first observation, there were no strength areas. Weaknesses included: Provides clear, complete written and/or oral directions; Plans appropriate teaching procedures which are age and ability appropriate; Uses assessment information (e.g., parent interviews, analysis of contextual factors, pretests, learning styles inventories, multiple intelligences surveys, and IEPs) to make instruction relevant and meaningful; Integrates knowledge from several subject areas in lessons. Addresses where appropriate: reading, career, vocational, transition, affective, social and life skills; Integrates diversity, including multicultural perspectives, into lessons. Enhances social participation for students with ELN.

Indicators 24-29 represent classroom management. In the second observation, weaknesses included: Plans appropriate teaching procedures which are age and ability appropriate; Uses assessment information (e.g., pretests, quizzes, unit tests, remediation, and enrichment activities) to plan differentiated learning experiences that accommodate differences in developmental and/or educational needs.

Indicators 30-34 represent assessment. In the second observation, weaknesses included: Provides clear, complete written and/or oral directions for instructional activities; Conveys enthusiasm for teaching and learning; Provides opportunities for the students to cooperate, communicate, and interact with each other to enhance learning; Establishes opportunities for communication with parents and/or guardians (newsletters, positive notes, extracurricular activities, etc.). Demonstrates knowledge of the subject(s) taught; Provides learning experiences that accommodate differences in developmental and individual needs of diverse learners (i.e., learning styles, multiple intelligences and enrichment/medial needs; Provides opportunities for students to apply concepts in problem solving and critical thinking; Responds to and elicits student input during instruction; Allows sufficient and equitable wait time to encourage students to expand and support their responses; Uses higher-order questions to engage students in analytic, creative, and critical thinking; and Uses family and/or community resources (human or material) in lessons to enhance student learning.

In the second observation, relative strengths were: Uses acceptable written, oral, and nonverbal communication; and Communicates high expectations for learning to all students. Relates weaknesses included: Conveys enthusiasm for teaching and learning; Provides opportunities for the students to cooperate, communicate, and interact with each other to enhance learning; Establishes opportunities for communication with parents and/or guardians (newsletters, positive notes, extracurricular activities, etc.). Demonstrates knowledge of the subject(s) taught; Provides learning experiences that accommodate differences in developmental and individual needs of diverse learners (i.e., learning styles, multiple intelligences and enrichment/medial needs; Provides opportunities for students to apply concepts in problem solving and critical thinking; Responds to and elicits student input during instruction; Allows sufficient and equitable wait time to encourage students to expand and support their responses; Uses higher-order questions to engage students in analytic, creative, and critical thinking; and Uses family and/or community resources (human or material) in lessons to enhance student learning.
enhance learning. Establishes opportunities for communication with parents and/or guardians (newsletters, positive notes, extracurricular activities, etc.); Demonstrates knowledge of the subject(s) taught; Uses a variety of appropriate teaching strategies (e.g., cooperative learning, discovery learning, demonstration, discussion, inquiry, simulation, etc.); Provides learning experiences that accommodate differences in developmental and individual needs of diverse learners (i.e., learning styles, multiple intelligences and enrichment/remedial needs); Provides opportunities for students to apply concepts in problem solving and critical thinking; Responds to and elicits student input during instruction; Allows sufficient and equitable wait time to encourage students to expand and support their responses; Uses higher-order questions to engage students in analytic, creative, and critical thinking; and Uses family and/or community resources (human or material) in lessons to enhance student learning.

Indicators 24-29 are related to the classroom environment. In the first observation, relative strengths included: Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment. Relative weaknesses included: Monitors and adjusts the classroom environment to enhance social relationships, motivation, and learning; Adjusts lessons according to individual student cues, professional reflections, and group responses; Attends to or delegates routine tasks; Uses a variety of strategies to foster appropriate student behavior according to individual and situational needs; and Uses instructional time effectively.

In the second observation, relative strengths included: Adjusts lessons according to individual student cues, professional reflections, and group responses; Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment; Uses instructional time effectively. Relative weaknesses included: Monitors and adjusts the classroom environment to enhance social relationships, motivation, and learning; Attends to or delegates routine tasks; Uses a variety of strategies to foster appropriate student behavior according to individual and situational needs.

Indicators 30-34 relate to assessment. This was the weakest section on both administrations. There were no relative strengths. All items are relative weaknesses.

In Fall Semester 2012, seven candidates successfully completed the Special Education Teacher Intern Assessment Instrument. Candidates were observed twice and the results of the two observations were compared. Indicators are in four categories: lesson planning (indicators 1-9), instructional delivery (indicators 10-23), classroom management (indicators 24-29), and assessment (indicators 30-34). The first observation is considered to be formative, so category skills are from the second, summative, observation. The strongest category was classroom management, with a mean of 2.52. The weakest area was assessment with a mean of 2.08. Lesson planning had a mean of 2.39, and instructional delivery 2.47.

Candidates were rated on 34 indicators on a 3 point Likert scale: 1- Expectations not met, 2- Expectations Met and 3- Expectations Exceeded. Strength areas were those with a 60% of candidates exceeding expectations, weakness areas were those with less than 30% exceeding expectations.

Indicators 1-9 represent candidate performance in lesson planning. In the first observation weaknesses areas were: Selects developmentally appropriate objectives for lessons based on state frameworks, and best practices in general and special education; Plans appropriate teaching procedures which are age and ability appropriate; There were no relative strengths in the first observation; Selects a variety of appropriate materials and technology for lessons. Adapts materials and technology for needs of students with ELN; Plans appropriate teaching procedures which are age and ability appropriate; Uses assessment information (ex. – pretests, quizzes, unit tests, remediation, and enrichment activities) to plan differentiated learning experiences that accommodate differences in developmental and/or educational needs in inclusive settings; Uses knowledge of students’ backgrounds, interests, experiences, and prior knowledge (e.g., parent interviews, analysis of contextual factors, pretests, learning styles inventories, interest inventories, multiple intelligences surveys, and KWLs) to make instruction relevant and meaningful. Integrates knowledge from several subject areas in lessons. Addresses where appropriate: reading, career, vocational, transition, affective, social and life skills; and Incorporates diversity, including multicultural perspectives, into lessons. Enhances social participation for students with ELN. There were no relative strengths.

In the second observation, weaknesses included: Plans appropriate teaching procedures which are age and ability appropriate; Uses assessment information (ex. – pretests, quizzes, unit tests, remediation, and enrichment activities) to plan differentiated learning experiences that accommodate differences in developmental and/or educational needs in inclusive settings; Integrates knowledge from several subject areas in lessons. Addresses where appropriate: reading, career, vocational, transition, affective, social and life skills; and Incorporates diversity, including multicultural perspectives, into lessons. Enhances social participation for students with ELN. Relative strengths included: Selects developmentally appropriate objectives for lessons based on state frameworks, and best practices in general and special education; Plans appropriate teaching procedures which are age and ability appropriate; and Uses a variety of strategies to introduce and close lessons. Opening and closing strategies actively involves students and enhance self management.

Indicators 10-23 represent instructional delivery. In the first observation, strength areas included: Communicates high expectations for learning to all students. Weakness areas included: Provides opportunities for the students to cooperate, communicate, and interact with each other to enhance learning; Establishes opportunities for communication with parents and/or guardians (newsletters, positive notes, extracurricular activities); Provides learning experiences that accommodate differences in developmental and individual needs of diverse learners (i.e., learning styles, multiple intelligences and enrichment/remedial needs); Provides opportunities for students to apply concepts in problem solving and critical thinking; Responds to and elicits student input during instruction; Uses higher-order questions to engage students in analytic, creative, and critical thinking; and Uses family and/or community resources (human or material) in lessons to enhance student learning.

In the second observation, relative strengths were: Uses acceptable written, oral, and nonverbal communication; Communicates high expectations for learning to all students; and Conveys enthusiasm for teaching and learning; Uses a variety of appropriate teaching strategies (e.g., cooperative learning, discovery learning, demonstration, discussion, inquiry, simulation, etc.); Relative weaknesses included: Provides opportunities for the students to cooperate, communicate, and interact with each other to enhance learning; Establishes opportunities for communication with parents and/or guardians (newsletters, positive notes, extracurricular activities); Provides learning experiences that accommodate differences in developmental and individual needs of diverse learners (i.e., learning styles, multiple intelligences and enrichment/remedial needs); Provides opportunities for students to apply concepts in problem solving and critical thinking; Responds to and elicits student input during instruction; Uses higher-order questions to engage students in analytic, creative, and critical thinking and Uses family and/or community resources (human or material) in lessons to enhance student learning.

Indicators 24-29 are related to the classroom environment. In the first observation, relative strengths included: Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment; Uses instructional time effectively.

Relative weaknesses included: Monitors and adjusts the classroom environment to enhance social relationships, motivation, and learning; Uses a variety of strategies to foster appropriate student behavior according to individual and situational needs.

In the second observation relative strengths included: Demonstrates fairness and supportiveness in order to achieve a positive, interactive learning environment; Uses instructional time effectively. Relative weaknesses included: Monitors and adjusts the classroom environment to enhance social relationships, motivation, and learning; Adjusts lessons according to individual student cues, professional reflections, and group responses; Attends to or delegates routine tasks; Uses a variety of strategies to foster appropriate student behavior according to individual and situational needs.

Indicators 30-34 relate to assessment. This was the weakest section on both administrations. There were no relative strengths. All items are relative weaknesses.

Many interns struggle with the standards of the Special Education Teacher Intern Assessment Instrument. The Mississippi Research to Intervention (RTI) system paired with the procedures of inclusion and the emphasis on Mississippian Curriculum Tests has created a blurring of roles in special education and general education. The faculty recognizes that internships need to be structured to more closely align with the actual duties of inclusion teachers and to provide more consistent mentoring from the clinical faculty and local special education staff. The weakest area by far is assessment. The assessment component in Assessment VII has been expanded to require elements developed in the assessment class, two methods classes and in the internship to give candidates more practice and more inculcation time for the complexity of classroom assessment.

Use of Evaluation Results

1.2. Individual conferences with principals and supervisors will be necessary to emphasize the necessity for formal lesson planning and systematic assessment. Although candidates have sufficient training in each of these areas in their methods classes there is limited generalization to K-12 classroom. Additionally the program is considering a different lesson planning format to make it more compatible with the formats used in local school district.

3. The program is in the process of creating a long range curriculum planning committee with public school practitioners to more closely align our methods classes with the demands of inclusion teachers.

4. It is felt that candidates overemphasize the written requirements of the internship to the detriment of actual teaching responsibility. Combined with the lack of strong instructional models, the opportunity to practice best practice is hindered. Two major changes to the program have been initiated to alleviate these concerns:

a. CSP 643 will now have an emphasis on the Teacher Intern Assessment Instrument (TIAI) and not the Teacher Work Sample. The candidates will teach a series of daily lessons which

Annual Report_AY2013_Teacher Education, Leadership and Research 59 of 89
will be critiqued using the TIAI. Video clips will be used to illustrate essential elements of each indicator. CSP 640 will emphasize the Teacher Work Sample.

b. Candidates who do not have an undergraduate in education will complete a two semester internship. In the first semester, the emphasis will be on contextual factors in the school and classroom, and on elements of the TIAI.

MED-SE 05: LO Demonstrate skills associated with analyzing student data and developing teaching/learning strategies based on the analyses.

Start: 7/1/2012
End: 6/30/2013

Learning Outcome
Analyze developmental level (general characteristics, language skills, motor skills, social skills, inclusion needs) of a student with significant learning, motor, sensory, cognitive, or social needs, and prepare intervention plan for that student. Candidates will prepare a case study which will be measured by the rubrics for the Individualized Education Case Study. Candidates must score a 3 or higher on each indicator of the rubric. Program goal is for 90% of candidates to meet expectations on each element of the rubric.

Data Collection (Evidence)
1. The Individualized Education Case Study will present candidates with a live case study. They will be given written and live documentation of a student with significant learning, motor, sensory, cognitive, or social needs. They will be asked to gather information about the student and prepare a comprehensive case study.

The case study will contain these five sections: a) Student Characteristics, b) Language Skills, c) Motor Skills, d) Social/Behavioral Skills, and e) Inclusion. Each of the sections will present a task and a series of prompts to guide the candidate through the process of responding to the task. Each section will be tied to specific Council for Exceptional Children competencies.

2. The case study will be completed in CSP 550 Programming for Individuals with Severe/Multiple Disabilities.

3. The case study will be rated with a 4-point rubric: 1 – Inadequate, 2 – Emerging Adequacy, 3 – Developing Adequacy, 4 – Achieving Adequacy. The candidate must score at least a 3 on each indicator.

Results of Evaluation
Summer 2012 was the last administration of the Individualized Education Case Study. Based on review from Council of Exceptional Children, the program is moving to a more comprehensive measure of language skills beginning in Summer 2013.

Use of Evaluation Results
This measure did not have enough layers to provide adequate information. In addition, it was not relevant to the world of practice. The program has submitted to Council of Exceptional Children a new assessment which is being field tested summer 2013.

The Alternate Assessment (MAAECF) Language Project is an exploration of the language section of the Mississippi Alternate Assessment of Extended Curriculum Frameworks (MAAECF). The assessment has five sections, a) application of alternate assessment process, b) targeting Objectives, c) alignment to general education, d) use of accommodations, and e) use of supports.

Candidates are given samples of the Present Level of Performance and Accommodations in Assessment pages for three students. Two of the samples will be from students who qualify for alternate assessment; one student would not be eligible. Candidates are to choose one of the students who qualifies for Alternate Assessment, justify their selection and then create an Alternate Assessment Portfolio for that student. Alternate assessment in Mississippi covers the areas of language, math and science. The candidates will only create the language section.

The Mississippi Alternate Assessment of Extended Curriculum Frameworks (MAAECF) for students with significant cognitive disabilities (SCD) is part of the Mississippi Statewide Assessment System. It is designed to assess the educational performance of students with disabilities who cannot participate in the general education curriculum, even with accommodations. Students in grades 3–8 and 12 who meet the state’s three SCD criteria are eligible to participate in the MAAECF. In general, eligible students are those who have a history of requiring extensive individualized instruction and have been classified as being severely to profoundly cognitively disabled or experience a pervasive developmental disability. (MDE, 2012)

Data Collection (Evidence)

**Assessment for fall 2011: Special Education Assessment Folio**

The Special Education Assessment Folio has replaced the Special Education Assessment Work Sample. The artifacts for this folio are developed in four classes: CSP 545 Special Education Assessment, CSP 643 Programming for Adolescents with Mild/Moderate Disabilities, CSP 696, Education of Individuals with Mild/Moderate Exceptional Learning Needs and the capstone class (CSP 547 Internship in Special Education or CSP 647 Action Research in Special Education). Artifacts are then revised and expanded based on the internship experience. The first section, Formal Assessment, is created in CSP 545, Assessment in Special Education. The subsections of this section include: Norm Referenced Assessment, Mississippi Assessment Systems: Research to Intervention (RTI), and Mississippi Assessment: Special Education, and Ethics in Assessment. The second section, Informal Assessments, is created in CSP 643 Programming for Adolescent with Mild/Moderate Exceptional Learning Needs and/or CSP 686 Education of Individuals with Mild/Moderate Exceptional Learning Needs. Subsections include: Curriculum Based Assessment Teacher Made Tests and Curriculum Based Assessment Authentic Assessment. The third section, Assessment for Long Term Planning, is created in the capstone course (CSP 547 Internship in Special Education or CSP 647 Action Research in Special Education).

Spring 2012 had the first full implementation of this assessment

In Spring 2012, six candidates were assessed on the overall rubric. Strongest performance was in Assessment for Long Term Planning; 67% of candidates were rated as having exceeded expectations. Weakest performance was in Formal Assessments where no candidates exceeded expectations.

In Fall 2012, seven candidates were assessed on the overall rubric. The strongest areas were Informal Assessments and Assessment for Long Term Planning with 71% of candidates exceeding the expectations; but the candidates also did well on formal assessments with 57% exceeding expectations.

**Use of Evaluation Results**

This assessment has proven to be too broad a measure to use for improvement of candidate performance or to guide program development. In the fall, the assessment will be revised to evaluate each section in more detail to align with Council for Exceptional Children (CEC) standards.

**MED-SE 07: LO Demonstrate mastery of the content knowledge associated with the Council for Exceptional Children Standards.**

Start: 7/1/2012
End: 6/30/2013

**Learning Outcome**

Demonstrate mastery of the content knowledge associated with the Council for Exceptional Children Standards as measured by the Education of Exceptional Children: Core Content Knowledge (0354), Cutoff score 142.

**Data Collection (Evidence)**

Candidates entering the program may be divided into three categories. One subgroup includes individuals who have completed an undergraduate degree in special education. These candidates have already met the Praxis Specialty Area requirement. The second subgroup includes individuals with undergraduate degrees in other areas of education. These individuals are advised to take the Praxis examination upon completion of 15-18 hours of coursework. In the last subgroup, members have undergraduate degrees in areas other than education. Some have already passed the special education Praxis examination due to requirements for alternate licensure in Mississippi. Others are full time students and are advised to take the Praxis examination upon completion of 15-18 hours of coursework. The Praxis examination must be passed in order to register for comprehensive examinations.

**Results of Evaluation**

Summary of Results:

**Assessment I**

Education of Exceptional Children: Core Content Knowledge (0353/0354)
Note: Average range for scores is reported for each separate administration. Levels are determined by the average scores listed for the administration period in which the scores were recorded.
Did not meet expectation: score is below average range
Met expectation: score is in average range
Exceeded expectation: score is above average range

Maintenance of a safe and supportive classroom environment that promotes student achievement. Domain III: Instruction (Standard 4) asks questions about instructional strategies or curriculum, organizing the learning environment, how to understand and manage students’ behaviors, theory and practice of effective classroom management and the design and maintenance of a safe and supportive classroom environment that promotes student achievement.

Domain IV: Foundations and Professional Responsibilities (Standard 5) covers human development and behavior, theoretical approaches to student learning and motivation, basic characteristics and defining factors for each of the major disability categories, impact of disabilities to certain individuals, co-occurring conditions, how families contribute to the development of individuals with disabilities, and the environmental and social influences on student development and achievement. Domain II: Planning and the Learning Environment (Standard 5 and 7) includes background knowledge, including conceptual issues, placement and program issues and integrating best practices from multidisciplinary research and professional literature into the educational setting (Standard 1); b) the school’s connections with the families, prospective and actual employers, and communities of students with disabilities (Standard 10); and c) historical movements/trends affecting the connections between special education and the larger society (Standard 1). The Delivery of Services to Students with Disabilities section included a) background knowledge, including conceptual issues, placement and program issues and integrating best practices from multidisciplinary research and professional literature into the educational setting (Standard 1); b) curriculum and instruction and implementation (Standard 4 and 7); c) assessment (Standard 8); d) structuring the learning environment (Standard 5); e) professional roles (Standard 9 and 10); and f) the effect of disability across the lifespan (Standard 3).

All candidates met or exceeded the Mississippi State Department of Education (MDE) standard for licensure (136). The MDE does not stipulate a cutoff score for subscores, nor does it require these subscores to be reported. As a program, upon the suggestion of CEC reviewers, we grouped subscores in terms of program expectations: 1- does not meet expectations, 2- met expectations, and 3- exceeded expectations. These categories do not connote an absolute standard for candidates; rather, they allow the program to identify strengths and weaknesses in preparation. Candidate scores were compared to the average range of scores for the administration period in which they took the examination, as reported by ETS. A simple system of categorizing the scores is not possible as the averages reported by ETS change with each administration. Candidates may have taken the examination any time within a 5 year period of submitting scores for licensure. Therefore, in a single semester, the program completers may have taken the test in several different time periods. The program designates their score as not meeting the expectation if it fell below the average range reported for the respective subscore when the candidate took the test, met expectation if it fell in the average range and exceeding expectation if it fell above the average. Of the five candidates reporting scores for 0353 in 2012-2013 on the Understanding Exceptionality section, 1 candidate did not meet the expectation, 3 candidates met the expectation and 1 candidate exceeded the expectation. For the Delivery of Services to Students with Disabilities section, 3 candidates did not meet the expectation, 1 candidate met the expectation and 1 candidate exceeded the expectation. The strongest overall area was general and Social Issues. Our program emphasizes cultural responsiveness and ethical practices. Weaker scores in Understanding Exceptionally and Delivery of Services to Students with Disabilities are in contrast to higher scores from candidates on equivalent subtests in the 0354 test in more recent years.

</table>

Because this test was discontinued in Fall Semester 2010, there are few candidates using this test for State licensure. In 2012-2013 only 5 candidates reported 0353 scores. Because of the small N, it may be hard to draw conclusions from these data. The range of scores for the group was from 136 (the minimum cutoff) to 184. Three subscores were reported for each candidate: Understanding Exceptionality, Understanding Services to Students with Disabilities.

The Understanding Exceptionality section content included a) human development and behavior as related to students with disabilities, (Standard 2) b) characteristics of students with disabilities, (Standard 2) and c) basic concepts in special education, including definitions of all major categories and specific disabilities (Standard 2). The Legal and Societal Issues Section included a) Federal laws and legal issues related to special education, including IDEA 2004, Section 504, Americans with Disabilities Act (ADA) (Standard 1); b) the school’s connections with the families, prospective and actual employers, and communities of students with disabilities (Standard 10); and c) historical movements/trends affecting the connections between special education and the larger society (Standard 1). The Delivery of Services to Students with Disabilities section included a) background knowledge, including conceptual issues, placement and program issues and integrating best practices from multidisciplinary research and professional literature into the educational setting (Standard 1); b) curriculum and instruction and implementation (Standard 4 and 7); c) assessment (Standard 8); d) structuring the learning environment (Standard 5); e) professional roles (Standard 9 and 10); and f) the effect of disability across the lifespan (Standard 3).

| Note: Average range for scores is reported for each separate administration. Levels are determined by the average scores listed for the administration period in which the scores were recorded. Did not meet expectation: score is below average range Met expectation: score is in average range Exceeded expectation: score is above average range |

Praxis 0354 Special Education: Core Knowledge and Applications

Most candidates now report the Praxis 0354 Special Education: Core Knowledge and Applications test for licensure. The current cutoff score is 142, but it will change to 152 in Fall Semester 2014. In 2012-2013, 11 candidates took the test. The scores ranged from 149 to 190. The subtest areas are: Domain I: Development and Characteristics of Learners, Domain II: Planning and the Learning Environment, Domain III: Instruction, Domain IV: Assessment, and Domain V: Foundations and Professional Responsibilities. Domain I: Development and Characteristics of Learners (Standard 2) covers human development and behavior, theoretical approaches to student learning and motivation, basic characteristics and defining factors for each of the major disability categories, impact of disabilities to certain individuals, co-occurring conditions, how families contribute to the development of individuals with disabilities, and the environmental and social influences on student development and achievement. Domain II: Planning and the Learning Environment (Standard 5 and 7) includes questions about characteristics and elements of an effective lesson plan, learning objectives that are measurable and appropriately challenging, means of providing access to the curriculum, organizing the learning environment, how to understand and manage students’ behaviors, theory and practice of effective classroom management and the design and maintenance of a safe and supportive classroom environment that promotes student achievement. Domain III: Instruction (Standard 4) asks questions about instructional strategies or...
techniques that are appropriate to students with disabilities, strategies that facilitate maintenance and generalization of concepts, selection and implementation of research-based interventions for such students, options for assistive technology, strategies that support transition goals, and preventive and intervention strategies for at-risk learners. Domain IV: Assessment (Standard 8) covers evidence-based assessments that are effective and appropriate for students, the uses of various assessments, how to interpret assessment results and the use of assessments results. Domain V: Foundations and Professional Responsibilities (Standard 1 and 10) includes questions about Federal definitions, Federal requirements for the pre-referral, referral, and identification, Federal safeguards of the rights of the stakeholders, components of a legally defensible individualized education program, major legislation, roles and responsibilities of other professionals who deliver special education services, strengths and limitations of various collaborative approaches, communication with stakeholders, and potential bias issues that may impact the teaching and interactions with students and their families.

All candidates met or exceeded the Mississippi State Department of Education (MDE) standard for licensure (142). The MDE does not stipulate a cutoff score for subscores, nor does it require these subscores to be reported. Again, as a program, upon the suggestion of CEC reviewers, we have begun to group subscores in terms of program expectations: 1- does not meet expectations, 2- met expectations, and 3- exceeded expectations. These categories do not connote an absolute standard for candidates; rather, they allow the program to identify strengths and weaknesses in preparation. Candidate scores were compared to the average range of scores for the administration period in which they took the examination, as reported by ETS. A simple system of categorizing the scores is not possible as the averages reported by ETS change with each administration. Candidates may have taken the examination any time within a 5-year period of submitting scores for licensure. Therefore, in a single semester, the program completers may have taken the test in several different time periods. The program designates their score as not meeting the expectation if it fell below the average range reported for the respective subscore when the candidate took the test, met expectation if it fell in the average range and exceeding expectation if it fell above the average.

Out of 5 major domains, the strongest area was Domain II: Planning and the Learning Environment, with 91% (10 out of 11) of the candidates meeting or exceeding the expectation. This is related to the strong emphasis in our program on lesson planning, unit planning and reflective teaching in our methods classes and in our field experiences. Average performance was reported on Domain I: Development and Characteristics of Learners, with 72% (8 out of 11) of the candidates meeting or exceeding expectations, Domain III: Instruction, with 72% (8 out of 11) of the candidates meeting or exceeding expectations, and Domain V: Foundations and Professional Responsibilities with 72% (8 out of 11) of the candidates meeting or exceeding expectations. Weakest performance was in Domain IV: Assessment with 64% (7 out of 11) of the candidates meeting or exceeding expectations.

**Use of Evaluation Results**

As the Mississippi Department of Education (MDE) cutoff scores for the 0354 specialty test increase from 142 to 152, we will make an increased effort through required coursework to raise scores. For Domain I: Development and Characteristics of Learners, CSP 640: Education of Young Children with Exceptional Learning Needs has been redesigned with a more rigorous emphasis on typical and atypical development across all developmental levels. For Domain II: Instruction, a new course has been added to the curriculum, CSP 686: Teaching for Inclusion. This course emphasizes differentiated instruction, co-teaching practices, grouping strategies, specialized instruction, and research based interventions. To strengthen Domain V: Foundations and Professional Responsibilities, candidates without classroom experiences will now take two semesters of internship. In the first semester, they will shadow a special education teacher and complete an ethnographic study of the special education internship setting. The ethnographic study has been added as a new section to Assessment V: The Special Education Teacher Work Sample: Postplanning. For candidates who are already teaching, this ethnographic study will be completed in their one semester internship. For Domain IV: Assessment is an area of concern. In Mississippi all formal assessments are performed by school psychologists; therefore, it is difficult to provide a rounded training experience in formal assessment and interpretation of assessment results. The faculty will be working with a local school psychologist to increase rigor and expand activities in CSP 545: Special Education Assessment.

Start: 7/1/2012  
End: 6/30/2013

Gen Ed learning outcome (competency)  
Outcome: Cultural Awareness

Developing an understanding of the need to be accepting of the variety of cultures future students will bring into the classroom and developing the ability to articulate that understanding particularly as it relates to education and their future students.

Data Collection

1. Assessment methods will include test items (multiple choice) and written research papers.
2. Data will be collected via item analysis of the test data which will come from the online management system used for testing. Data from written reports will be collected by the instructor of the course. A scoring rubric will be used to assess the written reports.
3. Data will be compiled into a report by the instructor. Data will then be presented to the faculty of the department. As a collective team, faculty will determine the level of success by students and the changes, if any, that need to be incorporated into the course.

Results of Evaluation

Analysis of data revealed that students have been successful in developing an understanding of the need to be accepting of the variety of cultures future students will bring into the classroom. They demonstrated the ability to articulate that understanding as they relate to future students.

Use of Results

1. No specific recommendations were made due to the students meeting the learning outcome.
2. No changes are being proposed.

Unit Goals

**TELR 2013_01: SPA/NCATE Compliance**

**Start:** 7/1/2012  
**End:** 6/30/2013

**Goal:**  
Prepare program reports for submission to specialized professional associations (SPAs) by March 15, 2012. The following programs will submit reports: B.S.E. in Elementary Education, M.Ed. in Special Education, M.A.T., and M.Ed. in Educational Administration and Supervision. In addition, non-SPA program reports will be prepared for the fall 2014 NCATE visit. Non-SPA programs include the M.Ed. in Elementary Education, the Ed.S. in Educational Administration and Supervision, and the Ed.D. Degree Programs.

**Evaluation Procedures:**  
Program coordinators and program faculty will develop and submit SPA reports by March 15, 2012, based on the standards and requirements of their respective SPAs.

**Actual Results of Evaluation:**  
All information was reported to the appropriate parties as specified in the Unit Goals. All reports from the agencies receiving the information gave good results. The Special Education program report had to be resubmitted due to essential data being delayed because of implementation of new evaluation procedures.

**Use of Evaluation Results:**  
The information obtained from the submitted reports and the end-of-year faculty activity reports are being used to support data-driven decisions related to recruitment and retention. The Special Education program report had to be resubmitted due to essential data being delayed because of implementation of new evaluation procedures.

**Related Items:**

**TELR 2013_02: Increase the number of graduates in Teacher Education Programs**

**Start:** 7/1/2012  
**End:** 6/30/2013

**Goal:**  
Increase the number of graduates in Teacher Education Programs by an average of 2% over five years, with the baseline year as AY 2007-08.

**Evaluation Procedures:**  
Continue to hold recruitment events in strategically identified areas. Track the number of events, as well as number of prospective applicants who attend.

**Actual Results of Evaluation:**  
In the area of Educational Administration and Supervision, there was an increase from 2011 to 2012 of 41 students. This counterbalanced the slight decrease in previous years. Elementary Education undergraduate enrollment increased slightly for 2012 counter balancing a slight decline in previous years. The Master of Arts in Teacher program has dropped slightly in enrollment the past two years but data from 2011 was not reported correctly preventing an accurate comparison between 2011 and 2012. The graduate program in Special Education had a significant increase in enrollment from 2011 to 2012. There were no changes needed based on the information submitted and responses received.

**Use of Evaluation Results:**  
Analyzed by early fall 2012 to support data-driven decisions related to recruitment and retention.

**Related Items:**

**TELR 2013_03: Increase Faculty publications**

**Start:** 7/1/2012  
**End:** 6/30/2013

**Goal:**  
Increase the number of papers submitted and published by faculty, with 2010 as the baseline year.

**Evaluation Procedures:**  
Use the end-of-year faculty activity reports to document publications and presentations.

**Actual Results of Evaluation:**  
The actual number of faculty publications increased from 2 in 2011 to 10 in 2012.

**Use of Evaluation Results:**  
Publications will be documented in faculty activity reports. The conducting and dissemination of research will provide new insights into ways to collaborate with Delta area schools and school districts to improve student learning, as well as research that will improve faculty teaching skills.

TELR 2013_04: Use results of Quality Matters evaluations to improve online courses.

Start: 7/1/2012
End: 6/30/2013

Unit Goal
Use results of Quality Matters evaluations to improve online courses.

Evaluation Procedures
The Chair will work with Program Coordinators to plan, prioritize work, and implement procedures for addressing online course weaknesses.

Actual Results of Evaluation
A Committee was formed from members of the Division of Teacher Education, Leadership, and Research to formulate specific goals for improvement of online courses. This committee was chaired by Dr. Corlis Snow.

Use of Evaluation Results
A list of requirements was developed for online courses and will be in 2013.

TELR 2013_05: Faculty will be trained in maintaining accuracy and consistency in advisement procedures when evaluating students.

Start: 7/1/2012
End: 6/30/2013

Unit Goal
Faculty will be trained in maintaining accuracy and consistency in advisement procedures when evaluating students.

Evaluation Procedures
Provide regular training for all personnel who collect and analyze data. Provide regular training for all faculty who evaluate candidate performance in appropriate use of various assessment instruments and assessment procedures. Provide confidentiality training for all who have access to confidential information. Maintain training session agendas and sign-in sheets.

Actual Results of Evaluation
Dr. Cheryl Cummins and Dr. Kathe Rasch, NCATE coordinators conducted sessions with all faculty members and discussed essential evaluation components in each course. This type of training is necessary for both SACS and NCATE. The division chair also discussed advisement procedures for all new and returning faculty in the beginning of the year faculty meeting as related to maintaining quality data collection for SACS and NCATE.

Use of Evaluation Results
The information obtained from the various aspects of evaluations made in designated classes will be used to make data driven decisions affecting instruction. This process is ongoing and in a state of constant modification.

TELR 2013_06: Faculty members will receive training in how to be an effective advisor.

Start: 7/1/2012
End: 6/30/2013

Unit Goal
Faculty members will receive training in how to be an effective advisor. Specific procedures will be followed which coincide with the policies of Delta State University.

Evaluation Procedures
Faculty members will demonstrate an understanding of appropriate advising procedures by accurately deciding various scenarios.

Actual Results of Evaluation
The faculty received specific training in advisement related to scheduling, registration procedures, and follow up with students. All facets were discussed using appropriate materials with faculty.

Use of Evaluation Results
The results will be used to ensure that better student advisement is provided in all facets of the programs of the student. The end result will be increased student achievement and student retention.

☐ Meets Standards  ☐ Does Not Meet Standards  ☐ Not Applicable

Narrative

Teacher Education Programs

- **Bachelor of Science in Elementary Education** - This degree provides initial licensure in grades Kindergarten through 6. Supplemental endorsements for middle level grades lead to licensure in grades 7-8. The program is available at the Cleveland campus, with a few courses offered at the Greenville Higher Education Center. In the Spring 2009 Semester a 2+2 Program with Hinds Community College was begun; most courses in the 2+2 Program are taught as hybrids with a few totally online.

- **Master of Education Degree in Elementary Education** – This program is available online. The purpose of the program is to prepare quality teachers who can teach at all levels of the elementary school.

- **Educational Specialist Degree in Elementary Education** – Beginning with the Spring 2009 Semester, this program has been totally online. The purpose of the program is to prepare quality elementary teachers who can function effectively and provide leadership for fellow teachers at both the primary and intermediate levels.

- **Master of Education in Special Education** – This program provides initial licensure in Special Education and is an online program. The program mission is to train teachers to work with children and youth with mild/moderate disabilities.

- **Master of Arts in Teaching (MAT)** – The MAT is an alternate-route program designed for promising individuals with non-education degrees who want to become teachers. It leads to a Master of Arts in Teaching Degree and Mississippi AA licensure. The program is online. The program offers an emphasis in Elementary (Grades 4 – 6) and Secondary Education (Grades 7 - 12).

Educational Leadership Programs - The following graduate degree programs are available for the preparation of educational administrators and supervisors: Master of Education in Educational Administration and Supervision – Public School Emphasis (full-time cohort program), Master of Education in Educational Administration and Supervision – Independent School Emphasis, and Educational Specialist in Educational Administration and Supervision (online). The Doctor of Education on Professional Studies Program has tracks in Elementary Education, Educational Leadership, Higher Education, and Counselor Education.

</table>

The data displayed in Table 6 indicates that enrollment in the Educational Leadership Program (M.Ed. and Ed.S.) increased during 2012 by 41 students over 2011. In the undergraduate Elementary Education Program, enrollment showed a downward trend in the last year from 114 to 107. Enrollment in Elementary Education graduate programs increased significantly between 2009 and 2010, but fall 2012 is lower than that of fall 2011. Data for the MAT was incorrectly reported for the fall and spring of 2011 so an accurate comparison cannot be made. For the graduate Special Education program, enrollment increased significantly in 2012 over the previous year. Enrollment in Professional Studies shows consistency and stability.
Trends in credit hour production identified in Table 7 include the following: (1) A slight decrease in credit hour production for the undergraduate Elementary Education Program was identified between 2011 and 2012. Credit hour production in the graduate Elementary Education program has increased overall in the last five years. (2) The graduate Special Education (CSP prefix) decrease slightly between 2011 and 2012. (3) Educational Leadership (AED prefix) increased in spring 2012 from 2011. Credit hour production in Educational Research (ELR prefix) increased in 2012 from previous years.

The data displayed in Table 8 indicates a decrease in B.S.E. graduates from previous years. M.Ed. in Elementary Education maintained enrollment from previous years. Ed.S. in Elementary Education increased significantly in 2012 above that of all previous years. M.Ed. in Educational Administration decreased slightly in 2012. Ed.S. in Educational Administration increased in 2012. MAT graduate numbers slightly decreased. M.Ed. in Special Education graduates decreased in 2012. Graduates in Professional Studies increased slightly in 2012-13.

Section IV.c

Diversity Compliance Initiatives and Progress

Judgment

☐ Meets Standards  ☐ Does Not Meet Standards  ☐ Not Applicable

Narrative

- A racial minority faculty member is the Coordinator of the graduate Elementary Education Program and one is Coordinator of the M.Ed. in Educational Administration and Supervision. One minority work-study student and one minority graduate assistant were employed to assist faculty in the Division.

- The Masters of Arts in Teaching, Special Education, M.Ed. in Educational Administration and Supervision, and Educational Specialist Educational Administration and Supervision Degree Program have attracted “other race”* students from across the Delta region. The online Master’s and Educational Specialist Degree Programs in Elementary Education have attracted “other race” students from across the Delta region, the State of Mississippi, and adjoining states.

- The Division had alternative course offerings during the past academic year through intersession courses, online courses, video-conferenced courses, hybrids, and intense schedules in an effort to accommodate nontraditional students, working students, or those with other encumbrances that might make traditional course offerings difficult to access.

* * Since the majority of Delta State University’s faculty, staff and students are classified as “White,” the term “other race,” as used above, is to be defined as including those individuals classified by the U.S. Census Bureau as American Indian, Alaskan Native, Asian, Black or African American, Native Hawaiian, or other Pacific Islander.

Narrative

Faculty Service to Area Schools and Educators
The Division provided ongoing professional development opportunities to area school district teachers and administrators. These focused on best practices for inclusive classrooms, including effective teaching of literacy skills, differentiated instruction, and RTI. Faculty also hosted events, such as reading fairs, and served as judges for events. The Educational Leadership Program partnered with DAAIS to provide professional development for local administrators in school law. All of these were done at nominal or no cost to area schools and school districts.

The online Master of Elementary Education and Educational Specialist in Elementary Education Degree Programs continue to draw new students. The second group of candidates (23) graduated from the Delta State University/Hinds Community College 2+2 in Elementary Education Degree Program graduated in 2012. The Ed.S. in Educational Administration and Supervision Degree Program continues to grow through the provision of online and hybrid course offerings.

Faculty Service to the Community Service continued in 2012 through the Literacy Enhancement Clinic, which is funded by a Delta Health Alliance grant. The Clinic provided clinical experiences and professional development opportunities for teacher candidates and diagnostic and remedial assistance to K-12 students, using health-related nonfiction text. Services were provided to the K-12 students free-of-charge.

One-Year Plan (July 1, 2009 – June 30, 2010)
The Division continued efforts to maintain the quality of the graduate and undergraduate programs, to provide professional development opportunities to area school district teachers and administrators, and to provide services to the community through the Literacy Enhancement Clinic. In addition, a Healthy Schools Coordinator was employed with DHA funds. The Coordinator worked with undergraduate Elementary Education and Master of Education in Educational Administration and Supervision faculty to infuse Healthy School components into their programs of study and developed a resource room of materials for check-out by undergraduate Elementary Education teacher candidates.

Two-Year Plan (July 1, 2010 - June 30, 2011)
Efforts from Year 1 continued to be refined. In addition, the Healthy Schools Coordinator worked with the instructor of the secondary education introductory course to infuse Healthy School components into these courses. The Healthy Schools Coordinator also worked with local schools on Healthy and Safe School initiatives.

Five-Year Plan (July 1, 2009 – June 30, 2014)
The long-term plan includes continuing to provide quality graduate and undergraduate programs, as well as providing professional development for educators and the community. Division faculty also plan to investigate the possibility of establishing long-term partnerships with area school districts to train teacher leaders and provide degree programs at the Greenville Higher Education Center Mississippi Delta Community College and Holmes Community College. The Healthy Schools Coordinator continued to work with faculty to infuse Healthy School components into programs of study and will work with local schools on Healthy and Safe School initiatives.

Grants, Contracts, Partnerships, Other Accomplishments

Judgment
☐ Meets Standards  ☐ Does Not Meet Standards  ☐ Not Applicable

Narrative

• The Literacy Enhancement Clinic, funded by an $86,260 Delta Health Alliance grant provided clinical experiences and professional development opportunities for teacher candidates and diagnostic and remedial assistance to 43 K-12 students through the use of health-related nonfiction texts. Ms. Susan Berryhill coordinates the Literacy Enhancement Clinic program. This program ceased in May 2012 because grant funds will no longer be awarded.

• The Literacy Across the Curriculum: Institute for Teachers in Grades 6 – 12 (LACI), funded by a $89,447 IHL grant, provided training for Delta area teachers in the incorporation of literacy skills in the content areas. Dr. Levenia Barnes, a retired faculty member, is the director of the Institute.

• The Delta Connection, a partnership with the Elementary Education Program at Blue Mountain College, provides an exchange of undergraduate elementary education candidates for the purpose of team-teaching literacy lessons to diverse elementary students at Bell Elementary in Boyle, MS, and New Albany Elementary in New Albany, MS. Mrs. Anjanette Powers coordinate this partnership.

• The undergraduate Elementary Education Program partners with the administration and faculty at Cypress Park Elementary and Nailor Elementary in Cleveland to teach CRD 326 Diagnosis and Remediation of Reading Difficulties on site at these schools. Mrs. Anjanette Powers coordinate this partnership.

• The Delta State University/Tishomingo County School District Partnership received a grant from the Tri-State Educational Foundation to assist in funding tuition for Northwest Mississippi teachers to receive a Master of Education in Elementary Education Degree an Ed. S. in Administration and Supervision, and an Ed.S. in Elementary Education from Delta State University. Dr. Corlis Snow coordinates the program in Elementary Education, and Dr. Terry Harbin coordinates the program in Administration and Supervision.

• The DSU/HCC Partnership Elementary Education Partnership is a 2+2 partnership between the Hinds Community College and the undergraduate Elementary Education Program. The program began in the Spring 2009 Semester and provides graduates of Hinds Community College and other residents of Hinds and surrounding counties the opportunity to complete a Bachelor of Science in Elementary Education Degree from Delta State University. Mrs. Terry Parrish and Dr. Joe Garrison coordinate this partnership.
- The Educational Administration and Supervision Program continued to receive significant funding through the Delta Health Alliance Grant, $698,280 for the 2010-2011 academic year, and $967,020 for the 2011-2012 academic year. The program also partners with DAAIS to provide useful professional development to Delta area administrators.

- Service Learning Data (list of projects, number of students involved, total service learning hours, accomplishments, etc.): Two undergraduate Elementary Education student organizations (Mississippi Early Childhood Association, Mississippi Association of Middle Level Educators) participated in a Delta State University Year of Green service learning project. The focus of the project was encouraging students at Nailor Elementary and Presbyterian Day School to recycle; ten teacher candidates participated in the project. A “Tacky Trashy Fashion Show” kicked off the project in February 2011, with teacher candidates performing a skit that explained the many ways that recycled trash may be used. Students at both schools recycled paper and cans, with teacher candidates picking these up weekly and taking them to a local recycling center. As a closing activity, a tree was planted on each school campus.

Committees Reporting To Unit
Each unit includes in the annual plan and report a list of the committees whose work impacts that unit or any other aspect of the university; along with the list will be a notation documenting the repository location of the committee files and records. Committee actions affecting the unit’s goals may be noted in other applicable sections of the annual reports. Not required to be included in the unit’s annual plan and report, but required to be maintained in the repository location, will be a committee file that includes, for each committee: Mission and by-laws, Membership, Process, Minutes.

Narrative

- The Division Chair is also chair of the Teacher Education Council (TEC). The TEC is the policy-making body for all undergraduate Teacher Preparation Programs at Delta State University. Membership is made up of representatives from the Teacher Preparation Programs, P-12 teachers and administrators, community college faculty, community leaders and P-12 parents, and undergraduate and graduate teacher education candidates. Committee records are archived in the Division Office and on the College of Education NCATE shared drive. An equivalent organization, the Graduate Professional Education Council (GPEC), is the policy making body for all graduate programs in Teacher Education

- The Division Curriculum Committee is made up of the division chair, who also chairs the committee; the Program Coordinators; undergraduate and graduate teacher and administrator candidates, and P-12 representatives. The committee reviews and approves all curriculum changes made to courses in the Division. Committee records are archived in the Division Office and on the College of Education NCATE shared drive.

- The Assessment Committee for the unit is currently chaired by Dr. Cheryl Cummins and Dr. Kathe Rasch. This committee guides the development and refinement of candidate performance assessments and the Unit Assessment System used to collect, analyze, and disseminate data on candidate performance. Committee records are archived in the Division Office and on the College of Education NCATE shared drive.

- The Ed.D. Program Coordinator, Dr. Jacqueline Craven, is chair of the Doctoral Admission and Curriculum Council, which is the policy-making council for the Ed.D. Program. Committee records are maintained in the Ed.D. Program Coordinator’s Office and on the College of Education NCATE shared drive.
