

Warren H. Rybczynski

Delta State University – Geospatial Technician

To Whom It May Concern:

I am a 25-year-old currently enrolled at Delta State University as a Geospatial Information Technologies Bachelor's student in Cleveland, MS. I have spent my time here working towards my degree and gaining experience as a Geospatial Technician by working in the GIT center located on the campus.

I am currently searching for an opportunity that will allow me to work in and learn more about the GIS and Intelligence Community world after my graduation which is expected to be Fall 2019.

Working within the GIS Center on Delta State University's campus, I have worked on projects such as MTM 50 production for the National Geospatial-Intelligence Agency for distribution among the Department of Defense.

I have spent six years serving in the Marine Corps Reserve with my first three years spent as a Field Radio Operator and my last three years spent as a Geospatial Analysts. Due to my military experience, I can carry out both written and verbal tasks with very little supervision.

My interest in this position comes from a desire to forward myself by learning more about world events and the Intelligence Community. I enjoy researching and learning about world events and how GIS plays into handling how to respond to such.

I believe that my desire to constantly learn about the world around me and my drive to improve myself, both personally and professionally, as well as the world would make me an undeniable asset to your team.

Thank you,

Warren H. Rybczynski
