

# Hannah L. Kistemaker

## Digital Media Artist

Dear Hiring Manager,

My name is Hannah Kistemaker. I am a Graphic Designer and Web Designer for the Geospatial Information Technologies Department at Delta State University as well as a Cinematographer and Film Editor. I am looking for a job that can utilize both the skills I've learned while in college as a Digital Media Artist and working at the Geospatial Information Technologies Center. My resume contains a detailed description of my skills and work experience in the field, which align perfectly with the open position that you've listed. If you are looking for a candidate who is dedicated to furthering themselves both professionally and intellectually, then please consider what I have to offer.

***I am well versed in working with Adobe Suites (This includes Premier Pro, Illustrator, After Effects, Light Room, Photoshop, and InDesign). My current GPA is a 3.7. I have 3+ years' experience working in the field of Digital Arts, in various capacities. I am willing to move to any location in the United States, and am looking for a salary equal to or in excess of \$30,000 a year, depending on the cost of living in that area.***

In reviewing my resume, you will note that I have experience working on movie sets as well as in office positions. I have also completed internships with marketing and advertising agencies. My background includes work with photography as well as video. I specialize in video editing, primarily with the use of Adobe Premier Pro. Furthermore, I am unique because I have worked

in environments where I am the only creative and environments where I work with a team of creatives. I will be graduating in the Spring of 2018 with a Bachelors of Fine Arts in Digital Media Arts. I hope to be a key player of your team and look forward to hearing back from you.

Sincerely,

Hannah L. Kistemaker
