Earthlink Pop-up Blocker:

If you’re already using TotalAccess, Pop-Up Blocker should be activated on your machine. You usually see the orange fist near your mouse when you click a link and it is blocked. Click on the down arrow and click on it to turn it off.

Older versions you may have to select Pop-up Blocker Options

Click off to turn it totally off. You may want to click on Open Allow List and add the following to only allow pop-ups.
