

## Google toolbar:

Click on the word **blocked** at the end of the red arrow to unblock pop-ups at this web site.

If the Popup Blocker counter isn't counting and you're not receiving popups, **it's likely that another popup blocker is installed on your system, working in tandem with the Google Toolbar**.. If a popup is already blocked by another popup blocker, the Google Popup Blocker won't detect the popup, and the counter won't count it.

The Google Toolbar stops web sites from showing you popup windows.

You will know a popup has been blocked when:

- You see this icon:  

- This mouse cursor:  

- And hear a sound alert

Popup windows can occasionally contain useful information. Click the popup blocker button to disable it for a site.
