- Academic map displays the courses required for admission to the dental hygiene program at the School of Health Related Professions (SHRP) at the University of Mississippi Medical Center in Jackson (UMMC). Other dental hygiene programs have similar requirements, but you should study the specific prerequisites for the schools to which you plan to apply. The prerequisite courses are typically completed in 2 years at DSU. After successful completion of 2 additional years at UMMC, you receive a Bachelor of Science degree in Dental Hygiene.
- A minimum of 57 hours is required.
- You must complete at least 16 hours of required sciences and 24 hours of required non-sciences before the application deadline.
- Also required: 8 hours of observation time with two licensed dental hygienist in two different clinical environments.
- ACT scores must be submitted to the dental hygiene program as a part of the application process.
- Credit for physical education, military science, dogmatic religion, vocational courses, and science courses designed for non-science majors may not be counted toward the prerequisites for professional school.
- The main criteria used in selecting students to the Dental Hygiene Program are: (1) overall GPA on prerequisite courses, (2) ACT scores, (3) interview scores, (4) hands-on dexterity exercise.
- IMPORTANT: Application to health professional schools is very competitive. Completion of the minimum requirements will not ensure admission. Admission decisions are based on policies established by the professional school's faculty and admission committee. Successful applicants typically have GPAs and other qualifications well in excess of stated minimums. Talk to your advisor for more information on what is realistically needed to have a good chance of getting into your desired professional school.
