To Whom It May Concern:

I am a current student at Delta State University in my junior year of the Geospatial Information Systems Undergraduate Program. I am a United States Marine Corps veteran trained in the field of GIS and intelligence disciplines searching an opportunity to further myself in the field of Geospatial Information Systems. My resume contains an up-to-date list of all classes and associated events and programs I have participated in that have helped prepare me for a position within your organization. As a member of your workforce I would be constantly striving to better myself on both a professional and intellectual level.

My interest in the position you are hiring for is an extension of my intense interest for learning about GIS as a data science that can be used to improve the world around us. Outside of work I am always learning and striving to advance my skills. As a member of your organization I would bring this same desire to learn and improve myself and would be dedicated to your goals and that of your organization. Thank you for your interest in me as a candidate for this position.

Regards,

Gunnar Kaltenberger
