DEAR HIRING MANAGER,

Are you scouting for a geospatial technician with:

- Over a year of real world work experience in the geospatial?
- Understanding of cartographic design and experience finishing maps?
- Fluency in ArcMap, and experience working in ArcGIS Pro, Digital Cartographic Studios, and ENVI55?
- Excellent skills in communication, written and oral?
- A desire to learn new skills and develop old ones?
- Professionalism and charm that will reflect well upon your agency?

If so, then please see the accompanying resume to find that you need not look any further. In my resume you will find that all of the above qualities are accounted for and more.

Please let me know of any internship, career, or other business opportunities that you believe would fit my qualifications. I am free to contact most days in the afternoon. However, feel free to leave a message for me to get back to you if your call is not answered.

Thank you for your time and consideration while viewing my cover letter and resume. I look forward to the opportunities that will present themselves through working with you.

Sincerely,
Peter Meharg

Peter Meharg
