

# Women Minority Report

The Monthly Newsletter of the Women  
Minority Business Development Center

## About

The Women Minority Business Development Center program offers technical business support to minority women who own small for-profit businesses. Our goal is to introduce clients to trainings that help them prepare to apply for and receive funding to start or grow their business. We also offer 1:1 technical support to clients to help them with individual needs as they strive to excel in a competitive world.

## What's New?

Continuing our Small Business Administration Federal Contracting Assistance Series, our next webinar will focus on the **Women-Owned Small Business (WOSB) Federal Contract Program**. The government limits competition for certain contracts to participating WOSB businesses to help provide a level playing field for women business owners. Joining the WOSB Federal Contract program makes a business eligible to compete for federal contracts reserved for the program's certified participants.

To learn more about this program and how it greatly benefits our WMBDC clients, join us on August 24th at 10am via Zoom to get more information on who's qualified, how to register, and what to submit to obtain your certification. Click [here](#) to register for this informational webinar.

# Website Program

A few of the clients who informed the WMBDC of their desire to obtain a free website can now share their live site with their customers! Congratulations to you all! If you are interested in obtaining a free website through the WMBDC, please contact us today. We have a few slots left! You must be a WMBDC client who currently do not already have a functioning website for your business to qualify. We are excited to share a few of the completed sites with you! Please congratulate these women! Click the website names to view them.
